

It's back for a **WHOLE** year

Heating & Cooling Incentive

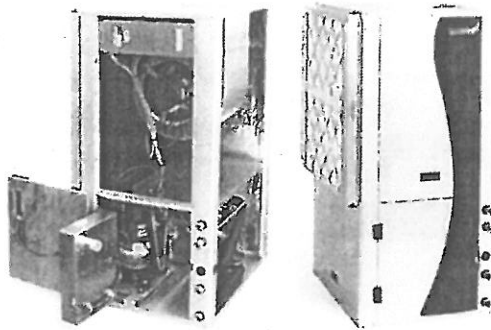

We are offering a bill credit to members who purchase energy efficient heating/cooling systems between July 1, 2014 and June 30, 2015. All equipment must be installed on Pioneer lines and the rebate applies to residential installations.

An air-source heat pump with an automatic fossil fuel backup (Dual Fuel), or with an electric back up, could earn you a \$400 bill credit. The system must meet the following guidelines:

>8.2 HSPF
>15 SEER

A geothermal system with either electric or fossil fuel back up could earn you an \$800 bill credit. The system must meet the following guidelines:

Closed Loop: >17.1 EER; >3.6 COP
Open Loop: >21.1 EER; >4.1 COP

- All heat pump sizing requires a Manual J or other industry recognized heat loss calculation.
- All equipment must be Energy Star-rated. Equipment should therefore also qualify for federal tax incentives. For more information, visit www.energystar.gov.
- Equipment calculations will be required at time of Pioneer inspection to receive the credit.

Members must show documentation of the unit's efficiency. To receive any incentive, members must participate in our Cool Returns load management program.

All equipment and loop installations must be installed in accordance with manufacturer's specifications and must meet applicable federal, state and local agency standards.

Dealers should provide to member as part of the sales-installation agreement:

- A. Owner's manual and instruction for equipment operation
- B. Installation instruction and warranty
- C. An offer of a maintenance/service contract
- D. Sketch of the loop layout location in reference to existing buildings
- E. Load calculation for equipment sizing
- F. Efficiency ratings and documentation of all installed equipment (AHRI Certification)
- G. Load management switch (Cool Returns) is installed on heat pump or geothermal unit

Only members with a dual fuel or geothermal system may be eligible for an electric rate discount, if they also have a 50 gallon or larger electric water heater with our load management switch.

Maximum two rebates per member-consumer.

Offer is good for a limited time—July 1, 2014 through June 30, 2015. This incentive applies to any Pioneer member who installs and signs a contract during the designated time frame. **To get started you must complete the Geothermal & Heat Pump Incentive Application form located on Pioneer's website www.pioneerec.com or available by request.** For more information about the heating/cooling systems, program details, rate discount or to set up an inspection of installed equipment contact **Ted Riethman** at 1-800-762-0997 or energyadvisor@pioneerec.com. **All work and inspections must be completed by June 30, 2015.**

A Touchstone Energy[®] Cooperative 

Geothermal & Heat Pump Systems Incentive Application

Please complete form **BEFORE** scheduling an appointment. When complete contact us at 1-800-762-0997 or by email at energyadvisor@pioneerrec.com to setup your appointment.
