

BRYANT™

WOMEN IN HVAC

CONGRATULATIONS!

Your Local Women Business Owner Achieves Recognition for Excellence in HVAC Industry

"Last year Tera Redmond, Vice-President of Redmond's Complete Comfort, was nominated as an outstanding female leader. She was also selected to be part of Bryant Women in HVAC - a newly formed, elite group of female leaders within the HVAC Industry. Tera has been invited to share in some exclusive events, including the 2015 Spring Retreat where she traveled to Indianapolis, IN. Only 35 women across the United States were invited to join this elite group in 2015.

The Bryant Women in HVAC, elite group, was such a success last year that they have grown to 92 members who have been chosen from across the United States. Bryant Women in HVAC meet on a regular basis and provide the manufacturer

with feedback on equipment and marketing programs.

This year, your local HVAC owner, Tera Redmond will now serve as a member on the Inaugural Team to help women in the HVAC Industry grow in the field. She has been asked to present at this year's Spring Retreat, which will be held at a factory location in Memphis, TN.

Redmond states "I have been honored as well as privileged to be part of this group of excellence in the HVAC Industry. I have grown more from knowing this group of women than I have ever imagined. I'm thankful for the opportunity that I have and for our team at RCC who support me as well as our local community for their ongoing support."

I am honored to be able to present to such an amazing group of women. I am also looking forward to the learning opportunities from this group of excellent women and bring new ideas back to our community.

As a Bryant Factory Authorized Dealer, RCC met Bryant's rigid standards of skills, service and technical know-how. Members of the RCC Team are NATE-certified to guarantee the knowledge, insight and training necessary to complete every job, no matter how complex, with a lasting solution.
