

Dear F.M. Berkheimer Customers,|

Safety is always one of our biggest concerns for you and our staff. With all the developments and spread of the Coronavirus (COVID-19) I would like to assure you that we at F.M. Berkheimer are taking common-sense safety measures and following the CDC's recommendations to keep our team members and you safe. Our employees have been strongly encouraged to utilize paid time off if they are not feeling 100%. They are also being provided with personal protective equipment for their and your benefit to aid in stopping the spread of illnesses. We also ask the same common courtesy of you before appointments. If you or anyone in your house has been exposed to COVID-19 or is exhibiting symptoms we ask that you let our staff know so that we can take the proper preventive measures. We thank you for your consideration of our team and allowing us to serve you. Together, we will get through this. As a friendly reminder we encourage you to change your air filters, humidifier pads, and continue utilizing your indoor air quality products for the best results in your home. If you are in need of more information on the indoor air products we recommend for protein-jacketed virus reductions or other contaminants please call us at 717.766.6152 or contact us via our website at www.FMBerkheimer.com and our staff will be happy to help you.

Sincerely,

Ian Berkheimer
