Visit us on the web at: <http://cincinnatiheatingandcooling.com>

Winter is here and with the below freezing temperatures your furnace has been working harder than usual to keep you warm and safe so take time to schedule your 21 point cleaning and inspection to ensure your furnace continues to work safely and efficiently for the coldest winter months.

Call our office, 513-769-0871, to schedule an appointment today! Don't forget to ask about our worry free "Preventative Maintenance Agreements" that offer discounts and priority service to meet your heating and cooling needs all year long.

Deal OF THE Month

Carbon Monoxide Detector

\$45.00* (\$138.00 value)

****Includes free installation(restrictions apply)***

Carbon Monoxide (CO) is a colorless, odorless, and tasteless gas which makes it extremely dangerous. CO detectors can protect your family from deadly carbon monoxide gas. Fuel-burning appliances such as oil and gas furnaces, gas water heaters, gas ranges and ovens, gas dryers, gas or kerosene space heaters, fireplaces and wood stoves are all sources of carbon monoxide.

A monitored carbon monoxide detector will alert you if high levels of this deadly gas are detected. Local building ordinances require the installation of carbon monoxide detectors in your home. An expert technician from Air Plus Heating & Cooling can properly install your CO detector and ensure it's functioning correctly.

4 EASY WAYS

to Lower Your Heating Bill this Winter

Save 10-20% by turning your furnace down 10-15 degrees while out of the house or sleeping.

Beware of ventilation fans in the bathroom and kitchen, which quickly suck away heat.

Use cold water for laundry and turn your water heater down to 120 degrees or less.

Change your furnace filter monthly and make sure that registers are not blocked.

FREE SECOND OPINION

We offer free second opinions if another HVAC contractor recommended replacement of your air conditioning or heating system.

Wi-Fi Smart Thermostats – help save energy dollars!

If you're tired of high energy prices throughout the year, even when you're not at home, it may be time for an upgrade. A Wi-Fi Thermostat can help you to save on monthly energy costs and makes your life a lot easier when you're out of town or staying in for a family dinner.

Traveling for vacation:

Typically, there's no way to make changes to your home's temperature when you go on vacation, and that can become a problem. In the event of an unpredicted weather change a Wi-Fi thermostat allows you to make

adjustments to the temperature, no matter where you are in the world. It connects to your Wi-Fi, and you can control the thermostat from an app on your Smartphone.

Manage your energy use:

With a Wi-Fi thermostat, you're always in control. Whether you're away at work or at play you can track your energy usage right from the app on your phone, and find out whether you need to make some adjustments to save energy and money.

Make it easier for everyone:

With a Wi-Fi thermostat, you have a thermostat on the wall that is easy to use and understand, along with a user-friendly app on your Smartphone. It's easy to make energy-smart choices and to keep everyone comfortable throughout your home from anywhere.

Safety:

Your Wi-Fi thermostat has the ability to alert you on your phone, tablet or laptop if your home gets to dangerously hot or cold.

Call our office, 513-769-0871, for pricing and installation information.

Tips from our Technicians

Inspect filters and replace as needed.

Dirty air filters can restrict airflow and hamper the efficiency of your entire HVAC system as well as cause the air you breathe to be polluted and unhealthy. Be sure to check air filters at

least once a month and replace them as needed and if you aren't sure of the correct type or size you can call our office for assistance at 513-769-0871.
