

and fresh air

The EPA reports that indoor air quality can be 100 times worse than outside air. Airborne pollutants may include:

- Dust, pollen, dirt, dander, mold spores, dust mites, viruses, fungi and bacteria.
- Gases, vapors and odors from cooking, furniture glues and finishes, cleaning products and more.

control

Too Little Humidity...

- Can cause static shock, dry skin and sinus irritation.
- Can crack woodwork.
- Makes you feel colder.

Too Much Humidity...

- Makes you feel sticky.
- Increases allergens.
- Causes wood warping and wallpaper peeling.

and energy savings

Heating and cooling is the number one expense in most homes. Improper temperature control can compound the problem. An Aprilaire Zoned Comfort Control System with several thermostats assures that proper temperatures are achieved in all areas of your home.

A word about Indoor Air Quality

Today's homes are constructed "tighter" than ever, allowing less air to be exchanged.

Now more than ever, homes must include temperature control, humidity control, air cleaning and ventilation. If you currently use portables, updating to whole-home solutions saves you time, trouble and energy costs.

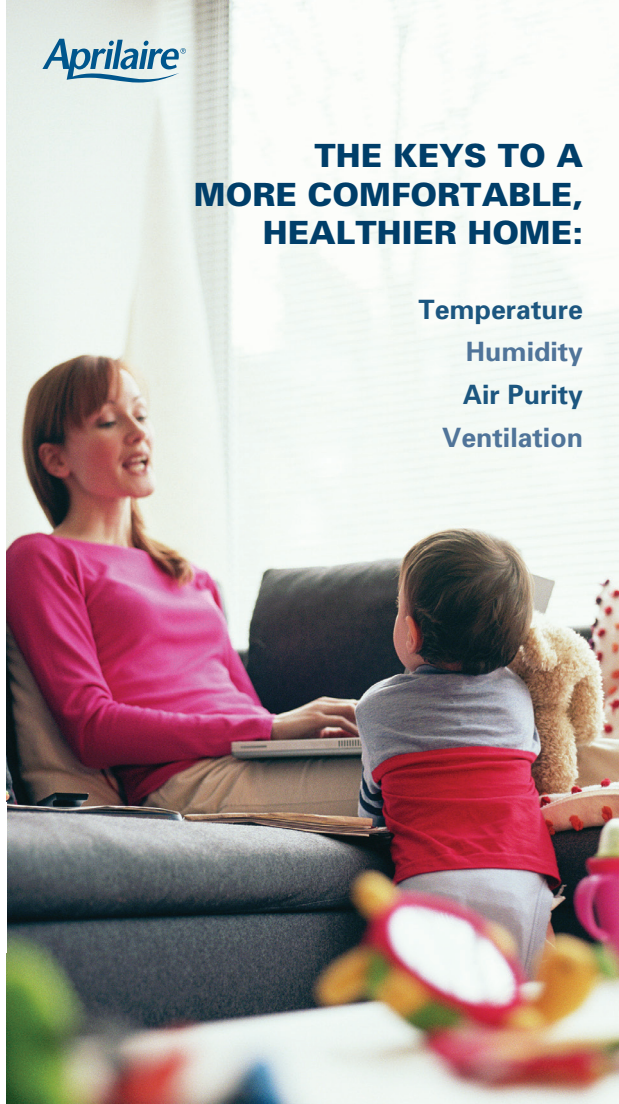

Why Whole-Home vs. Portables?

- Greater capacity and protection in every room
- Operates silently away from your living area
- Lower maintenance, less mess

Aprilaire

THE KEYS TO A MORE COMFORTABLE, HEALTHIER HOME:

Temperature
Humidity
Air Purity
Ventilation

for clean and fresh air

- Aprilaire offers high performance media air cleaners to help keep your home clean and improve the air you breathe by trapping molds, fungus, pollen and respirable dust.
- The Aprilaire Model 5000 electronic air cleaner offers “best in class” performance for relief from allergies and other health issues by removing microscopic spores, bacteria, smoke and other harmful particles.
- Aprilaire controlled ventilation efficiently provides fresh outside air only when needed.

Aprilaire Whole-Home Air Cleaners & Ventilation

for humidity control

Too Much Humidity

- Aprilaire central dehumidifiers work both independently and in conjunction with your central air conditioner to control excess moisture, allowing you to be as comfortable as possible every hour of every day. High capacity, removes 90-135 pints per day.

Too Little Humidity

- Aprilaire whole-home humidifiers provide proper humidity levels for optimum comfort and protection. Aprilaire automatic humidifiers offer set-it-and-forget-it control to automatically deliver up to 50% more soothing moisture than portables.

Aprilaire Whole-Home Humidifiers & Dehumidifiers

for comfort and energy savings

- Use a programmable thermostat “set-back” strategy to automatically change temperature settings as needed to save on your energy bills.
- Aprilaire thermostats offer simple programming and an easy-to-read, large backlit display.
- Aprilaire Zoned Comfort Control allows you to control the temperature in up to four separate areas of your home to help eliminate hot and cold spots. Control your comfort where you want, when you want.
