About Commercial-Grade**

# PROLINE® MASTER GAS WATER HEATERS

8-YEAR WARRANTY • COMMERCIAL-GRADE COMPONENTS

The ProLine Master family of gas water heaters offers a wide range of water heating solutions, all with a commercial-grade, wholesale-focused design. All A. O. Smith products use Coregard™ stainless steel core anode rods, but the ProLine Master Series has increased anode protection with either larger or multiple anodes depending on model. Ultra-low NOx units are available where required.

# PROLINE® MASTER ELECTRIC WATER HEATERS

8-YEAR WARRANTY • COMMERCIAL-GRADE COMPONENTS

The ProLine Master family of electric water heaters offers a wide range of water heating solutions, all with a commercial-grade, wholesale-focused design. Like the gas models, ProLine Master products have increased anode protection with either larger or multiple Coregard™ stainless steel core anodes depending on model. ProLine Master products are also outfitted with longer lasting, stainless steel upper and lower elements that are modeled after those used in our industry leading commercial line.

## Commercial-Grade ProLine Master Water Heaters feature:

- An 8-year warranty that is exclusive to the wholesale channel
- Larger commercial-grade stainless steel core anode rods that provide exceptional tank protection
- Longer-lasting commercial grade stainless steel upper and lower elements

# What does it mean to be commercial-grade?

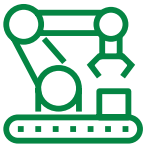

**ProLine Master models offer an 8-year warranty and include commercial-grade component upgrades not available on other standard residential products.**

By combining the high end features and warranty protection consumers are looking for with a competitive price that positions our partners to outsell the competition, we've created a unique win-win situation. There's nothing standard about commercial grade.

## Expertise in commercial water heating

- A. O. Smith is a leader in commercial water heating
- We understand how important hot water is to hospitals, hotels, restaurants, etc.
- We use the same expertise and quality standards in our ProLine residential products.

## Components Made In-House

- A. O. Smith produces most of our product component parts at our own factories.
- Many of the same parts are hard at work whether you're installing a commercial product in a laundromat or a ProLine® commercial-grade residential product in a homeowner's laundry room.

## Rigorous Quality and Endurance Testing

- A. O. Smith products are run through quality and endurance testing and inspection to ensure that we're providing a tougher residential product that gives our contractors the ultimate advantage.

## Upgrade Your Business to Commercial-Grade

We believe that your customer's water heater should overperform no matter where it's installed. That's why, at A. O. Smith, we're continuously working to elevate and improve our vast line of commercial-grade water heaters. Introducing the ProLine® Master Series. Available exclusively to professional plumbing contractors, this new family of residential gas and electric water heaters is designed to provide you with a competitive advantage.
