

APCO[®] MAG

WHOLE-HOUSE AIR PURIFIER

APCO[®] With Magnetic Mounting

The Fresh-Aire UV APCO[®] Mag (magnetic mounting) system works with your central air system to reduce odors, toxic chemical vapors, germs and mold in your home. APCO[®] Mag uses the same technology as the standard APCO unit but uses a magnet mounting plate and a remote mounted power supply.

UV-C light suppresses microbial growth on HVAC coils and surrounding areas

Fight Germs & Odors Without Ozone

Unlike many air-cleaning devices, APCO[®] produces no ozone. UV-C light shining on the APCO[®] activated carbon matrix causes a photocatalytic reaction which transforms odor molecules into harmless water vapor and CO₂ which are released into the airstream.

Mold, germs, and viruses are sterilized by UV-C light shining on the carbon matrix and in the air as they pass by.

ENTER THE MATRIX

The matrix of titanium dioxide infused activated carbon cells inside APCO[®] Mag attracts and holds odors, microbes, and VOC molecules which are then catalyzed by exposure to UV light.

The carbon cells are self-cleaning and the system is virtually maintenance-free other than lamp replacement.
