

Mini-Split Systems

Up to 24.5 SEER
Up to 11.5 HSPF
Single- and Multi-Zone

A HOME ENVIRONMENT THAT'S EVERYTHING YOU WANT IT TO BE.

BUILT FOR LIFE. YOURS.

A close-up photograph of a white mini-split outdoor unit. The unit features a large circular fan grille with a white grid pattern. A man's hand, wearing a gold ring, is visible on the right side of the unit, resting against the white casing. The man is wearing a light blue button-down shirt. The background is a dark grey wall with horizontal lines.

Delivering consistent comfort and peace of mind

Since 1928, we've been providing homeowners with reliable, well-built heating and cooling products that make life easier and more comfortable. Thoughtfully designed, our AirEase™ line of mini-splits offers efficiency and dependability, so you can enjoy peace, quiet and comfort every day of every year.

HVAC experts you can trust

Your comfort is our priority. Your AirEase Dealer will take the time to understand your comfort needs. They know you want the best performance, value and dependability from your heating and cooling system, and they have the products and expertise to help satisfy these demands. That means you can rely on your AirEase Dealer to help you find the right comfort solution for your home and your lifestyle.

Helping to create the perfect environment.

Choosing the right mini-split system for your home environment is a big decision. Your AirEase Dealer can help you create the right system for your home comfort needs. To help you make the best and smartest system choice, here are a few things to consider:

EFFICIENCY

It's pretty simple. A high-efficiency mini-split system helps lower your monthly utility bills. Efficiency is measured in SEER (Seasonal Energy Efficiency Ratio) during the summer and HSPF (Heating Seasonal Performance Factor) during the winter—the higher these numbers, the greater the efficiency. Replacing an older unit with a 14 SEER/8.2 HSPF or higher unit can increase performance and start saving you money immediately.

RELIABILITY

You can always count on your AirEase mini-split system. Built and tested to standards well above industry norms, the inverter-driven compressor offers higher efficiencies than traditional split systems.

AIR QUALITY

Where you live matters. Your family's sensitivity to a host of natural and man-made allergens means enhanced air quality is all the more critical in your home. And don't forget humidity levels when you're considering the ideal system for year-round comfort.

NOISE REDUCTION

Comfort and performance also include quiet operation of your mini-split system.

Mini-splits system basics.

When traditional ducted systems aren't practical, our mini-splits are the right option from the brand you know and trust.

- Units do not require new ductwork
- Wired wall-mounted thermostats are optional
- Outdoor units can be mounted on the ground and hung on the wall in a variety of locations
- Remotes act as the thermostat (standard) and reduce the need to pull new wires
- Indoor units can be mounted where needed and select models offer a wide range of air handler units for a more refined look and feel

Most common mini-split applications:

No Ductwork:

Mini-splits are a cost-effective heating and cooling solution in homes that do not have existing ductwork. It can be very expensive to install ductwork throughout a home and mini-splits allow for individual control over multiple rooms' heating and cooling.

Home Additions or Conversions:

Mini-splits are a popular option when expanding your home's footprint as they eliminate the cost of extending the existing HVAC system to accommodate additional space.

Hot and Cold Spots:

Mini-splits are a perfect solution for rooms suffering from hot or cold spots, offering more control and even temperatures. Mini-splits can help provide a more comfortable environment as either a replacement for or supplement to your existing central HVAC system.

How it works

Take control of your specific heating and cooling needs.

4D HV

Proven technology and exceptional value

Take advantage of the latest technology and enjoy efficiency levels well above traditional ducted solutions.

4D HPS

A powerful combination of performance and efficiency

The perfect blend of higher efficiency and quieter operation delivering up to 24.5 SEER. Offers a higher efficiency than traditional ducted systems at a competitive price point.

4D HPM

Maximum control when and where you need it

This multi-zone unit provides efficient spot heating and cooling, allowing you more control over your environment.
