Features to be proud of:

Energy Efficiency

Energy efficiency equates to cost savings. An Amana® brand APG14M and APG16M Packaged Gas Electric Units offer up to 16 SEER performance during the summer months. “SEER” stands for Seasonal Energy Efficiency Ratio, a measure used by the U.S. Department of Energy to rate the cooling efficiency of air conditioners and heat pumps. The higher the SEER, the greater the efficiency—and the lower the operating cost. Compared to lower SEER units, an Amana brand Packaged Gas Electric Unit can provide significant savings on your electric bill.

Quiet Comfort

You can be assured that your Amana brand APG14M and APG16M Packaged Gas Electric Unit will provide you with quiet operation. To minimize operating sounds, we’ve combined quiet scroll compressor technology with a high-density foam sound cover and a fully insulated blower compartment to provide unobtrusive performance.

An enhanced level of comfort before and after your purchase

When it’s time for a new indoor comfort system, you shouldn’t have to sweat the decision of which manufacturer to choose. The legendary Amana® brand, trusted by generations for its performance and reliability, gives you one less thing to worry about. Choose an Amana brand APG14M and APG16M Packaged Gas Electric Unit with confidence, knowing you’re getting the world-class engineering and good ol’ American craftsmanship you’ve come to expect from the Amana brand.

Gas and electric functionality make this the total package

Operated as an electricity-powered air conditioner in the summer and a gas-fueled furnace during the winter, an Amana brand APG14M and APG16M Packaged Gas Electric Units offer years of cost-effective, worry-free indoor comfort from a single, self-contained unit. Providing the protection of two limited warranties*, units can deliver cooling or heating capacity from two to five tons, a Seasonal Energy Efficiency Ratio (SEER) of up to 16 and 81% Annual Fuel Utilization Efficiency (AFUE).

You’d be hard-pressed to find a better compressor

Perhaps this packaged unit’s most important component in terms of cooling efficiency and performance is the compressor — the heart of this system’s summer operation. The Amana brand APG14M and APG16M Packaged Gas Electric Units feature an energy-efficient scroll compressor, which is designed with fewer moving parts that result in lower energy use compared to units with reciprocating compressors.

*The security of the Amana brand’s amazing limited warranties**

To truly seal the deal, the Amana brand APG14M and APG16M Packaged Gas Electric Units are backed by one of the best warranties* in the industry. This unit features a Lifetime Heat Exchanger Limited Warranty* and a 10-Year Parts Limited Warranty*. The longevity of premium Amana brand products combined with this excellent warranty* coverage offer you a level of purchase protection that’s the stuff of legend.

LIMITED WARRANTY* PROTECTION

*Complete warranty details available from your local dealer or at www.amana-hac.com. To receive the Lifetime Heat Exchanger Limited Warranty (good for as long as you own your home), and the 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.

EXTENDED SERVICE PLANS AVAILABLE

For even greater peace of mind, ask your dealer or visit our website at www.amana-hac.com for more details about Asure™, an affordable Parts and/or Labor Extended Service Plan for your entire Amana® brand HVAC system.
