

Heating & Cooling Systems

PREFERRED™ SERIES WHOLE-HOME HUMIDIFIERS

Models STM, LBP, SBP, WBP, LFP

Benefits of a **BRYANT® HUMIDIFIER**

Humidity Management

A Bryant humidifier can “moisturize” dry, heated winter air, making your home feel more comfortable. That’s important because during the heating season, your home can feel drier than the desert.

Comfort

Properly humidified air can provide comfort benefits during the heating season beyond feeling warm and cozy. It can help relieve the discomfort of dry nasal passages, itchy skin and static shocks as well.

Healthy Air

Keeping humidity under wraps can protect against warping or structural damage to wood flooring or furnishings.

Whole-Home Solution

Our Bryant humidifiers easily tie into your heating and cooling system to provide a convenient, effective whole-home solution. With five distinctly different models, there’s a Bryant humidifier that is just right for your home.

Efficiency

Keeping wintertime relative humidity in check can help you feel more comfortable without overheating your home. You might even be able to turn the thermostat down a few degrees to save on energy costs.

Limited Warranty

To the original owner, our Preferred Series whole-home humidifiers are covered by a 10-year parts limited warranty. The limited warranty period is five years if not registered within 90 days of installation except in jurisdictions where warranty benefits cannot be conditioned upon registration. See warranty certificate at bryant.com for complete details and restrictions.

Outstanding performance **WHATEVER** the season.

If you could look inside a Bryant® whole-home humidifier, you'd see what drives the performance: a serious commitment to quality.

- Our attractive and corrosion-resistant thermoplastic cover on bypass and fan-powered models is designed to withstand high temperatures and impact for long-lasting durability.
- The cabinet on model STM is fabricated from heavy gauge sheet metal and is painted for resistance to corrosion.
- Model STM quietly delivers high temperature water vapor into the duct with a unique dispersion tube.
- Model LFP's precision-tuned fan and motor combination quietly and efficiently draws dry air through the evaporator pad.
- On our bypass models LBP, SBP, and WBP, the furnace blower moves dry air quietly through the humidifier.
- Optimum moisture distribution is measured and controlled with our combined solenoid valve, water delivery system and control.

Model LFP Shown

No matter which model is right for you, water is delivered to the dry air in the form of vapor.

Bryant Whole-Home Humidifiers

Model	STM	LBP	SBP	WBP	LFP
Unit Type	Steam	Large bypass	Small bypass	Water saver bypass	Large fan-powered
Capacity (gallons/day)	34*	17	12	17	18
