Top Reasons It Takes Bryant

PASSIONATE SERVICE

Bryant® dealers do more than just deliver quality comfort system enhancements like our comprehensive lineup of indoor air quality products. They also deliver knowledge, experience and Whatever It Takes® to get each job done right, the first time. You and your system will receive the attention to detail and professional service delivered only by Bryant dealers.

EXCEEDING EXPECTATIONS

With more than 100 years of experience, Bryant offers a full lineup of products designed with whole-home comfort in mind. Through innovative design and rigorous testing, our products are built to exceed expectations, backed by Bryant® warranty protection.

NEW CONVENIENCES

With a diverse line of products to address almost any need, from hot or cold spots, to improving indoor air quality and programmable thermostats with Wi-Fi® capabilities, convenient comfort can be yours when you choose Bryant.

CUSTOMIZED COMFORT SOLUTIONS

Healthy home solutions are not one size fits all. Our dealers provide solutions based on your specific needs. From financing and rebates to reliable products professionally installed, Bryant provides options that help keep you and your wallet comfortable.

EFFICIENCY & SAVINGS

Products designed to enhance indoor air quality can keep your system running cleaner to help maximize efficiency and reduce energy consumption. By reducing monthly utility bills over the life of your system, you'll see how efficient equipment pays off.

Fine-Tune Your Comfort

There is a Bryant® indoor air quality product for almost any comfort need or budget. Your Bryant dealer can help you decide which is right for you.

	HEALTHY AIR	COMFORT	SAFETY	EFFICIENCY
PURIFIERS	Patented Captures & Kills™ technology provides up to 99% inactivation rate against selected viruses, bacteria and fungi.			Clean 100% of the air flowing through your system, keeping components like your blower operating at peak efficiency.
FILTERS	Up to 13 MERV efficiency and highly effective at removing unwanted airborne pollutants like dust.			Clean 100% of the air flowing through your system, keeping components like your blower operating at peak efficiency.
CARBON MONOXIDE ALARM	Build-up of carbon monoxide can cause dizziness, headaches, confusion, upset stomach and chest pain.		Alerts you when unsafe levels of carbon monoxide are found in your home.	
UV LIGHTS	UV lights minimize the growth of mold spores, bacteria and fungi on your cooling coil to minimize their entry into the air you breathe.			By minimizing buildup on your cooling coil, UV lights help keep your system operating efficiently.
HUMIDIFIERS	Properly humidified air provides relief from itchy, cracked skin, itchy watery eyes, dry nasal passages, cracked woodwork.	Dry winter air can feel cold and uncomfortable. Add a humidifier to make heated air more comfortable.		When you feel comfortable at lower heated temperature settings, you can save on your heating bill.
DEHUMIDIFIERS	Overly moist air can become a breeding ground for irritants that can affect allergy symptoms. A dehumidifier can help resolve these issues.	A dehumidifier can provide soothing relief from hot, sticky summer humidity.		Feeling more comfortable at higher temperatures in the summer can lead to savings on the electric bill.
HRV/ERV/ FRESH AIR VENT	Minimize the effects of household pollutants from air fresheners, personal care products, paint, glue, plastics and carbon monoxide.	Fresh air ventilation provides relief from stale air and odors without opening a window and letting hot summer or cold winter air into the home.		Much more efficient than opening a window and letting heated or cooled air escape.

Let Bryant Clear the Air

If you could examine the air inside your home, you might be surprised to find viruses, bacteria, mold spores, pollen and animal dander. In fact, indoor air can be five times more polluted than outdoor air. In response, Bryant® offers a variety of air purification, filtration, ventilation and humidity control products that take comfort, efficiency and safety to an entirely new level.

Air Purifiers & Filters
Captures and Kills™ technology eliminates three top pathogens, including the common cold and influenza virus.

Humidifiers
Adds moisture to the air, helping keep static, sore throats and dry skin at bay.

Dehumidifiers
Draw moisture out of the air, improve indoor air quality and help preserve wood furnishings.

Ventilators
Circulates fresh air from outside into your home.

UV Lamps
Attack and kill mold and bacteria growing on the indoor coil.

Carbon Monoxide Alarm
Monitors levels of CO in the home and sounds an audible alarm if unsafe levels are detected.

Your Air Quality Advisor

Your Bryant® dealer is equipped to analyze your indoor air, create a report of specific levels of air pollutants in your home, and recommend solutions. The analysis takes about 30 minutes and when it's done, your dealer will be able to discuss specific areas of concern, then map out a strategy for overcoming the issues found within your indoor environment.

Finding YOUR Solution

Having the ability to pinpoint your issues without guesswork is critical, because your home's indoor air quality is made up of six different factors: particle allergens, volatile organic compounds, temperature, carbon dioxide, relative humidity and carbon monoxide. Most homes have at least one indoor air quality issue. Because poor air quality can affect children, the elderly, pregnant women and anyone with chronic respiratory issues, it's important to follow through with corrective action.

Evolution® Perfect Air™ Purifier

MERV (Minimum Efficiency Reporting Value) is a rating of your air filter's ability to remove dust from the air that is passing through.

EXTREMELY HIGH GERMICIDAL EFFECTIVENESS

Patented Captures and Kills™ technology provides the highest tested germicidal effectiveness with a 99% inactivation rate against selected viruses, bacteria and fungi. This technology is also used in high-level government facilities and hospitals.

HIGHEST EFFICIENCY FILTRATION

At MERV 15, the Evolution® Perfect Air™ purifier offers the highest efficiency of any Bryant® filtration product. It not only keeps the air in your home cleaner, it helps clean the air running through your comfort system as well to help maximize its fuel efficiency.

CONTINUOUS PROTECTION

The air in your home is "re-purified," not just filtered, up to 8 times per hour. The Evolution Perfect Air purifier can clean up to 100 times more than portable units.

EASY TO MAINTAIN

No cleaning required. Simply remove and replace the media cartridge periodically to maintain peak performance.

The Evolution® Perfect Air™ Advantage

Pollen and mold spores can enter through open doors and windows. Bacteria and viruses can spread between family and friends. Fine dust particles get kicked up from floors and furniture, and dander and hair fall from pets. These contaminants can circulate throughout your home, spreading disease or triggering allergic and asthmatic reactions. Bryant purifiers are ideal for homeowners with allergy concerns, individuals susceptible to airborne germs such as infants and the elderly, and those with sensitivity to the effects of pollen, pets and more.

Independent lab testing on the Perfect Air™ purifier technology has shown a 99% germicidal effectiveness (inactivation) within 24 hours for the following:

Viruses: Human influenza, common cold, avian influenza, wild type A influenza, measles, smallpox surrogate, and coronavirus (SARS)

Bacteria: Bacillus subtilis, Mycobacterium parafortuitum (tuberculosis surrogate), Staphylococcus aureus, Serratia marcescens, Pseudomonas aeruginosa, and Streptococcus (causes sore throat)

Fungi: Aspergillus versicolor

LIMITED WARRANTY

To the original owner, the Evolution® Perfect Air™ purifier and Preferred™ air purifier are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits are not conditioned on registration will automatically receive the registered limited warranty. Ask your Bryant dealer about optional extended warranties, which may include labor.

Preferred™ Air Purifier

The Preferred™ air purifier offers a competitively priced alternative to the Evolution® Perfect Air™ purifier while still providing similar Captures & Kills™ capabilities. This model provides a high rate of effectiveness against various germs while filtering at an excellent MERV 13 efficiency. Providing 96% germicidal effectiveness (inactivation) within 24 hours for the following:

Viruses: Human influenza and common cold

Bacteria: Streptococcus (causes sore throat)

Air Quality Products

Designed by a company that also manufactures heating and cooling systems, Bryant® media-type air filtration products efficiently trap unwanted airborne particles while allowing free flow of cleaner air to maintain your system's energy efficiency. That's a big advantage, because companies that focus mostly on filters don't always take into account the need for unimpeded airflow. Bryant filters treat 100% of the air flowing through your system to help keep internal components cleaner. As a result, you can expect less wear and tear and longer life.

Carbon Monoxide Alarm

Some of the products and appliances that make your home a better place to live can produce a colorless, odorless gas called carbon monoxide. Fuels such as natural gas, LP gas, kerosene, coal, wood and charcoal, as well as automobiles can all have the potential to produce it. Bryant® carbon monoxide alarms use sophisticated electronics and unmatched sensor technology to detect, record, and alert you to when dangerous levels are present.

SAFETY FIRST

Exposure to carbon monoxide can cause fatigue, chest pains, impaired vision and coordination, headaches, dizziness, confusion, nausea, and can even be fatal. Bryant recommends placing a carbon monoxide alarm on each level of the house and in every bedroom.

EASY-TO-READ DISPLAY

You can monitor the current carbon monoxide level in your home on the large, easy-to-read display. Health care professionals can quickly assess levels of exposure on the display by accessing its peak level memory.

LIMITED WARRANTY

To the original owner, the Bryant® carbon monoxide alarm is covered by a seven-year limited warranty. Ask your Bryant dealer for complete details and restrictions.

Ultraviolet Germicidal Lamps

Mold spores, bacteria and fungi can invade the dark, damp surfaces of your cooling coil. Left unchecked, buildup of those contaminants can reduce system efficiency and release potentially harmful pollutants such as mold spores and unpleasant odors into the air you breathe. Bryant offers a solution designed to help eliminate these irritants from your home comfort system - the Bryant® UV Light.

ENHANCED EFFICIENCY

The germicidal UV lamp bathes the cooling coil with intense, UV-C light, helping sterilize its surfaces to maximize efficiency.

LITTLE OR NO MAINTENANCE

No cleaning is required. Simply replace the lamps once a year.

LIMITED WARRANTY

To the original owner, the Bryant® ultraviolet germicidal light lamp is covered by a 90-day parts limited warranty and lamp base is covered by a 10-year parts limited warranty upon timely registration.*

*The limited warranty period is five years if not properly registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty. See warranty certificate at bryant.com for complete details and restrictions.

Humidifiers

In the winter, the air in your home can be dryer than the desert! That overly dry air can cause itchy, cracked skin, dry nasal passages and nosebleeds, itchy eyes, annoying static shocks, and cracked woodwork. Adding a Bryant® humidifier can help alleviate these conditions while also minimizing the opportunity for dust and other irritants to circulate in the air that you breathe. Bryant humidifiers can even help you save money on your heating bills, because if you feel warmer, you can turn down the thermostat.

VERSATILITY AND PERFORMANCE

Bypass and fan-powered models deliver water vapor quietly and efficiently. Water saver models convert 100% of the water used. Our steam model delivers high temperature water vapor with its unique dispersion tube.

SIMPLE MAINTENANCE

All of our humidifiers are designed with easy access for replacement of the water panel or steam canister.

LIMITED WARRANTY

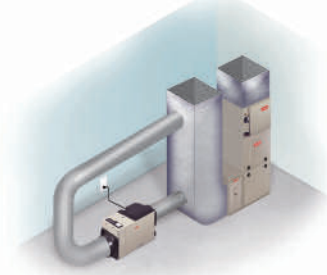

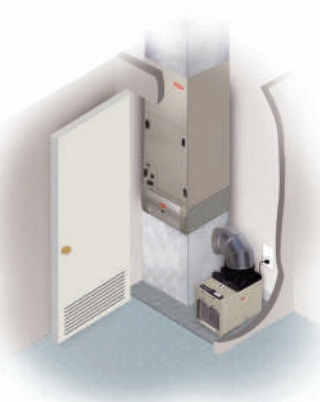

To the original owner, Bryant® humidifiers are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not properly registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty. See warranty certificate at bryant.com for complete details and restrictions.

Dehumidifiers

When it's hot and sticky outside, your air conditioner or heat pump can work overtime. This often causes indoor humidity levels to creep upward, making you and your family uncomfortable and vulnerable to potential mold and dust mites. A Bryant® whole-home dehumidifier can address these issues and enhance your comfort by drawing excess moisture from cool indoor air.

INSTALLATION VERSATILITY

Offered in a variety of installation options ranging from basement, closet, attic, crawl space, or stand alone, your dealer has the flexibility to offer the ultimate combination of unobtrusive design and customer convenience.

LIMITED WARRANTY

To the original owner, Bryant® dehumidifiers are covered by a five-year parts limited warranty. See warranty certificate at bryant.com for complete details and restrictions.

Heat and Energy Recovery Ventilators

Newer, more tightly constructed homes are designed to conserve energy. At the same time, they can trap airborne particles, gases, unpleasant odors, and moisture, allowing them to recirculate throughout your home.

Bryant® fresh air ventilators work behind the scenes to remove these pollutants and refresh your indoor environment while saving energy. It's kind of like opening all the windows without letting heated or cooled air escape.

Application Flexibility

The unique design and compact size of the Legacy™ Line ERV makes it easy to install in virtually any application. In fact, the unit can be attached directly to the ductwork or even your furnace. And with only 2 ducts coming out of the unit instead of 4 like on other ERVs, it requires less room and time to install.

LIMITED WARRANTY

To the original owner, Bryant® heat recovery and energy recovery ventilators are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not properly registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty. See warranty certificate at bryant.com for complete details and restrictions.

Fresh Air Vent

The fresh air vent provides an alternative, economical solution to bring fresh air into your home. Although it doesn't have the heat exchange capabilities of an ERV or HRV, fresh air is introduced in a controlled way. It's the perfect solution in regions where building codes require fresh air ventilation.

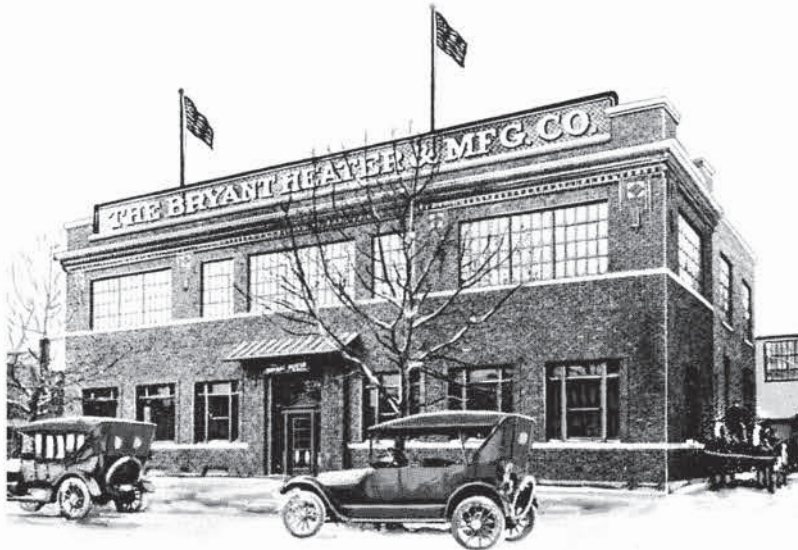

LIMITED WARRANTY

To the original owner, the Bryant® fresh air vent is covered by a five-year parts limited warranty. See warranty certificate at bryant.com for complete details and restrictions.

For more than a century, homeowners have associated Bryant® heating and cooling products with the highest standards of indoor comfort and Bryant dealers as service leaders. Through commitment and dedication of our product development and manufacturing teams, we have consistently met every new challenge head-on and delivered the products to meet or exceed expectations. Our national network of passionate Bryant dealers is at the forefront of our success. Knowledgeable in the field, and equipped to address your home comfort needs, our dealers deliver customized comfort solutions to you and your family by doing...
