

Champion® residential gas furnaces

Z9ET Two-Stage,
Condensing Gas Furnace

Smart design for maximum savings and benefits

The Champion® Z9ET Two-Stage, Condensing Gas Furnace is the perfect high-efficiency heating solution for customers, while reducing time spent on installations and servicing. Designed to meet IRA/25C and other benefit requirements, customers will love the savings.

Designed for easy installation and servicing for economical and reliable performance

- Optimized efficiency for eligibility with 25C Tax Credits, rebates and other incentives* 
- Auto-staging allows optimized two-stage operations, which help preserve the life of your equipment while providing more consistent comfort
- Compact cabinet fits in most spaces with an ideal 33in. height
- Five-speed ECM blower motor maximizes efficiency
- Stainless-steel secondary heat exchanger for durability and performance
- Easy configuration for upflow, downflow and horizontal applications

* Contact your local Champion dealer/installer or governing authorities for specific details on qualifying for tax credits, rebates and other incentives.

NEW fold-up duct flanges

Designed for easy installation

1. Compact cabinet size designed to fit residential installations in a basement, closet, alcove, attic, recreation room or garage
2. Four-way, multi-position with rotatable inducer and internal condensate trap (condensing models)
3. No electrical knockouts to deal with saves time on installations
4. Easy access to controls to connect power and control wiring

NEW front-facing screws

Designed for easy servicing

5. Redesigned 1/4-turn knobs for easy and quick door removal
6. Front-facing screws for easy service access
7. Built-in, high-level self-diagnostics with easy-to-read fault code display
8. New safety features include 100% shut-off for main gas valve and blower door safety switch

Designed for reliable performance

9. Five-speed, direct-drive ECM blower motor improves SEER2 ratings, while using less electrical power
10. Blower-off delay for improved efficiency performance
11. Electronic hot-surface ignition saves on fuel costs with increased dependability and reliability
12. Less than 1% airflow leakage in performance testing conditions
13. Corrosion-resistant, stainless-steel secondary heat exchanger for long-lasting performance

Designed with two-stage operation

14. Prolongs the life of your equipment
15. Minimizes temperature swings for more consistent comfort
16. Operates more quietly than single-stage equipment

Maximize the benefits of your furnace by pairing with more from our home comfort systems.

Enabled for hybrid systems

Pair with an efficient outdoor heat pump unit to create a hybrid system that can help save on energy costs, while being friendlier to the environment.

Low-GWP compliant

Our new furnaces are designed for use with R-454B, the environmentally friendlier refrigerant. Learn more about low-GWP refrigerants here:

Navigating the refrigerant transition

Indoor air quality

Choose from our wide selection of indoor air quality (IAQ) products to filter, sanitize and improve the comfort of your home.

All limited warranties are subject to terms, conditions and exclusions set forth in the product's limited warranty statement. See applicable limited warranty statement for details.
