

PERFORMANCE SERIES

DUCTLESS SYSTEMS

WHERE COMFORT MEETS FLEXIBILITY

Featuring

R454B

Models:
D5CERAH, D5CERAA

WHY ARE SO MANY HOMEOWNERS GOING DUCTLESS?

Whether you're adding an extra room or converting an attic into a living space, you want your home renovation to be as comfortable as possible. Day & Night® Performance Series ductless systems deliver ultra-quiet and efficient comfort for practically any space. They also help eliminate hot and cold spots, making them ideal climate solutions for garages, sunrooms, attics, additions and more.

Environment

Day & Night is committed to providing our planet and people with a better future by offering the best refrigerant for each application. After years of research, development and field trials, we will be transitioning to the use of R-454B, with a 75% reduction in global warming potential.

Efficiency

SEER2 (Seasonal Energy Efficiency Ratio 2) and HSPF2 (Heating Seasonal Performance Factor 2) ratings are like your car's MPG; the higher the number, the greater the potential for savings. Performance Series heat pumps offer a range of efficiencies that reach as high as 22.4 SEER2 and up to 9.4 HSPF2.

Minimally Invasive

Day & Night Performance Series ductless high wall units can be installed with a simple wall bracket and a small, three-inch hole. No demo, no patching, no painting required.

Durability

A heavy-gauge, galvanized steel cabinet, heavy-duty wire coil guard and baked-on enamel provide superior protection against dings, dents and other outdoor threats.

Low Cost of Ownership

Day & Night mini splits continually adjust the compressor speed as conditions change—for consistent comfort with lower energy usage. That means you can save up to 30% on your energy costs.

Limited Warranty

To the original owner, our Performance Series heat pumps are covered by a 10-year parts limited warranty upon timely registration.*

BRING A BOOST OF COMFORT TO ANY ROOM

COMPLETE YOUR HOME COMFORT SYSTEM
