RevitaLife is reverse osmosis, reimagined. Our 5-stage system provides unparalleled protection against contaminants, but drinking water quality is about so much more than protection. We give you an even better glass of water with restored essential minerals, a more natural pH that's easier on your body, and a fresh taste.

Restores Beneficial Minerals

- Remineralizing process restores calcium and trace minerals to your water
- Raises the pH of your water to a more natural level
- Introduces minerals prior to the storage tank for optimum taste and quality after storage

Healthier Living

- Powerful RO filter membrane effectively removes contaminants down to .0001 micron in size
- Unique remineralizing process restores healthy minerals, raises pH and improves taste

Better Tasting Water

- Water tastes clean and natural
- Makes great-tasting coffee, tea and ice cubes
- True 5-stage system with remineralization provides healthier and more refreshing water

Internal Water-Driven Pump

- Integrates a quiet non-electric permeate pump to reduce water usage and improve water quality
- Produces water faster and provides an increased flow at the faucet
- Extends the life of the pre-filters and membrane

Carefree Water

- No need to buy or haul bottled water
- Quick-change filters last up to one year, and the RO membrane lasts up to 2 years
- Large-capacity 3 gallon storage tank ensures an abundant supply of refreshing drinking water

Environmentally Friendly

- Water-driven permeate pump uses no electricity and reduces water usage by up to 80%
- No need to dispose of plastic water bottles

Did you know?

There are over 84,000 different chemicals present in the United States today, according to the EPA's TSCA Chemical Substances Inventory.* The EPA is only regulating about 90 of them in the water.**

* EPA, Chemical Assessment and Management Program, TSCA Chemical Substances Inventory. (available at <http://www.epa.gov/ChAMP/pubs/programs.html>)
 ** Jackson, Lisa (Administrator, Environmental Protection Agency). Testimony to the Senate, Committee on Environment and Public Works, February 2, 2011. (available at http://www.epa.gov/ocir/hearings/testimony/112_2011_2012/2011_0202_lpj.pdf)

Effectively Removes Most Contaminants, Including:

- ✓ Pharmaceuticals
- ✓ Hormone mimickers
- ✓ Arsenic & lead
- ✓ Fluoride
- ✓ Chromium 6
- ✓ Sodium
- ✓ Chlorine & chloramines
- ✓ Pesticides & herbicides
- ✓ Nitrates/nitrites – linked to developmental problems
- ✓ Volatile Organic Compounds (VOCs) – known to cause nervous system damage
- ✓ Disinfection Byproducts (DBPs) – linked to cancer, reproductive and developmental problems
- ✓ Perchlorates – linked to thyroid and developmental problems
- ✓ And many more

Special Features:

- ✓ Remineralizing filter adds beneficial minerals back to water
- ✓ Space-saving 3 gal storage tank
- ✓ Integrated water-driven permeate pump reduces water usage by up to 80%
- ✓ Your choice of designer faucet

Warranty:

- ✓ 1 year limited warranty

Specifications:

| Model | Min Incoming Water Pressure | Max Incoming Water Pressure | Hardness (less than) | Maximum Iron | Maximum H ₂ S | Maximum Manganese | Maximum TDS | Turbidity (Cloudy Water) |
|---------------|-----------------------------|-----------------------------|----------------------|--------------|--------------------------|-------------------|-------------|--------------------------|
| RL5010 | 30 psi | 100 psi | 10 gpg* | 0.2 ppm | 0.0 ppm | 0.05 ppm | 2000 ppm | 1.0 ntu |

*Water hardness above 10 gpg requires installation of EasyWater No-Salt Conditioner.

This is not a disinfection system. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before and after the system.

Constructed of NSF and/or FDA approved materials.

How It Works

1. Sediment Filter

Removes dirt and sediment particles down to 5 microns in size.

2. Carbon Block Cartridge

Removes chlorine and reduces many pesticides, herbicides, THMs, VOCs and more.

3. Reverse Osmosis Membrane

Effectively removes most remaining contaminants down to .0001 micron in size, including nitrates, arsenic, chromium 6 and many more.

4. Remineralizing Filter

Raises pH and adds beneficial minerals back to water. The water-driven permeate pump boosts pressure and directs the water into the compact 3 gallon storage tank.

5. Final "Polishing" Filter

High-quality activated carbon provides a final filtration step on the way to the faucet.
