Energy-Efficient Gas Furnaces

Up to 80% AFUE Performance

Reliability and Performance You Can Trust

Choose the EverRest Elite Series gas furnace that's right for your family and you'll feel all warm and fuzzy inside.

Your new gas furnace efficiently creates heated air to provide indoor comfort and delivers dependable performance during the colder months of the year.

How the EverRest Elite Series makes your home comfort decision easier.

The purchase of an home comfort system is not one to be taken lightly. However, it's one you can make with an air of confidence when you consider all that distinguishes the trusted EverRest Elite Series.

- **Comforting Craftsmanship** – Innovative engineering, world-class manufacturing processes and the relentless drive to ensure each unit lives up to our uncompromising standards—these attributes define the EverRest Elite brand. Assembled in facilities in Texas, EverRest Elite Series gas furnaces are built to last and last and last.
- **Energy Efficiency** – Energy efficiency equates to cost savings. A gas furnace's efficiency rating can primarily be determined by two factors: its AFUE rating (Annual Fuel Utilization Efficiency), which indicates what percentage of each dollar of natural gas purchased is used to heat your home; and the type of blower used in the furnace.
- **Stainless Steel, Tubular Heat Exchanger** – Unique tubular stainless-steel construction formed using dual-diameter pipe and wrinkle-bend technology results in an extremely durable heat exchanger.
- **Continuous Air Circulation** – Provides added filtration and keeps air moving throughout your home to help maintain total comfort.

- **Durable Silicon Nitride Igniter** – Eliminates the need for an energy-wasting pilot light.
- **Two-Stage Gas Valve** – Provides more efficient and comfortable operation.
- **Self-Diagnostic Control Board** – Continuously monitors the system for consistent, reliable operation, stores last diagnostic codes in memory; and indicates condition through a 7-segment display for quick troubleshooting.
- **Heavy-Gauge Steel Cabinet** – Durable finish resists corrosion and protects essential components.
- **Thermally Insulated Cabinet** – The fully-insulated cabinet means air leakage of less than 2% to maximize heat transfer efficiency and lower blower noise.

Premium Quality/Quiet Comfort

As a homeowner, you want a gas furnace that operates quietly and efficiently. All EverRest Elite Series two-stage furnaces include noise-reducing insulation and aim to run at low speeds for extended periods. As a result, they generate only 25% of the typical noise produced by standard efficiency models.

EverRest Elite Series two-stage, variable-speed blower furnaces operate at the industry standard 80% AFUE, but its variable-speed blower can improve its efficiency rating and enable the furnace to maintain consistent warmth in a low-heat capacity mode without inefficient high-heat surges associated with single-speed gas furnaces.

The EverRest Elite Series AMVC8 Energy-Efficient Gas Furnace advantages include:

- **ComfortBridge™ Technology** – Continuously monitors system performance for customized indoor comfort.
- **The CoolCloud™ HVAC App** – Enables qualified technicians to connect, configure and diagnose select HVAC systems quickly and accurately.
- **Efficient and Quiet Variable-Speed Circulator Motor** – Provides quiet system startup and shutdown with highly efficient performance.
- **Quiet, Variable-Speed, Induced-Draft Blower** – Provides precise control and enhanced energy efficient performance as compared to a natural draft furnace.

* Complete warranty details are available from your local dealer or at www.everresteliteseries.com. To receive the 10-Year Unit Replacement Limited Warranty, 20-Year Heat Exchanger Limited Warranty (in each case, good for as long as you own your home), and 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.

The next step in home comfort.

EverRest Elite Series brand energy-efficient gas furnaces are built to last and have many features that make these gas furnaces one of the best choices on the market today. Our industry-leading stainless-steel, tubular heat exchanger with wrinkle-bend technology is the next step in home comfort.

And select EverRest brand energy-efficient gas furnaces come with a 10-Year Unit Replacement Limited Warranty. Should the heat exchanger on this unit ever fail in the first ten years on the original, registered homeowner, a new unit will be provided .

Reliability and Performance You Can Trust

Relax, with the EverRest Elite Series, reliable, long-lasting product performance is our top priority. Through rigorous quality assurance scrutiny, superior craftsmanship and world-class manufacturing processes, we make sure that each EverRest Elite Series product is the best it can be.

The security of the EverRest Elite brand's amazing, limited warranties*

When you choose the EverRest Elite brand, you can rest assured that you'll receive a refreshingly affordable product that's covered by what many consider to be the best product warranties in the heating and cooling industry. Most of our gas furnace products feature a 10-Year Unit Replacement Limited Warranty, while all include a 10-Year Parts Limited Warranty. Together, these warranties offer homeowners a high level of purchase protection; now, that's the stuff of legend.

AsureSM
EXTENDED SERVICE PLAN

The One-time Unit Replacement coverage and One-time Compressor Replacement coverage is available to the original homeowner for years 11-99 after the installation date. Ask your dealer for complete details about the ASURE Extended Service Plan options or visit our website at www.EverRest.com for full details.

ComfortBridgeTM technology

ComfortBridge off-the-wall communicating technology constantly monitors the performance of a high-efficiency heating and cooling system. As ComfortBridge technology gathers data, it uses it to make automatic adjustments, as needed; to use the minimum amount of energy required to create consistent and comfortable indoor heating and cooling. Rather than installing the communications technology circuit board in the thermostat (which is connected to an inside wall in a home), the ComfortBridge circuit board is securely installed in the indoor unit of the energy-efficient heating and cooling system. ComfortBridge technology works with any single-stage thermostat to help create customized indoor comfort specifically for you and your family.
