Energy-Efficient **Gas Furnaces**

Up to 80% AFUE Performance

Reliability and Performance You Can Trust

Choose the EverRest Extreme Comfort gas furnace that's right for your family and you'll feel all warm and fuzzy inside.

Your new gas furnace efficiently creates heated air to provide indoor comfort and delivers dependable performance during the colder months of the year.

EverRest Extreme Comfort makes your home comfort decision easier.

Many have discovered that a reliable and energy-efficient home comfort system doesn't have to cost a fortune. EverRest brand whole-house systems feature many of the latest and greatest money-saving technology benefits we can offer. They are designed and engineered to run quietly and pretty much worry-free.

- **Comforting Craftsmanship** - Innovative engineering, world-class manufacturing processes and the relentless drive to ensure each unit lives up to our uncompromising standards—these attributes define the EverRest brand. Assembled in facilities in Texas, EverRest Extreme Comfort gas furnaces are built to last and last and last.
- **Energy Efficiency** - This gas furnace's 80% AFUE rating means that 80 cents of every energy dollar warms your home. The Department of Energy (DOE) established the AFUE (Annual Fuel Utilization Efficiency) system to calculate the annual operating cost of residential gas furnaces.
- **Heavy-Duty Aluminized-Steel Tubular Heat Exchanger** - Constructed from tubular aluminized steel, the primary heat exchanger is designed for outstanding durability and heat transfer and is essential to a gas furnace's performance. This distinctive heat exchanger employs wrinkle-bend technology, which was developed to deliver extraordinary durability and long-term reliability.

- **Durable Silicon Nitride Igniter** - This advanced energy-efficient technology eliminates the need for a traditional pilot light. The igniter is constructed for both strength and outstanding reliability.
- **Heavy-Gauge Steel Cabinet** - Durable finish resists corrosion and protects essential components.
- **Insulated Furnace Cabinet** - Even the metal walls of this gas furnace support energy efficiency. A fully insulated cabinet helps to keep the heat inside the furnace and has less than a 2% air leakage rate. The insulation also assists with noise suppression when the furnace is operating.

Premium Quality/Quiet Comfort

As a homeowner, you want a gas furnace that operates quietly and efficiently. All EverRest Extreme Comfort two-stage furnaces include noise-reducing insulation and aim to run at low speeds for extended periods. As a result, they generate only 25% of the typical noise produced by standard efficiency models.

EverRest Extreme Comfort two-stage, variable-speed blower furnaces operate at the industry standard 80% AFUE, but its variable-speed blower can improve its efficiency rating and enable the furnace to maintain consistent warmth in a low-heat capacity mode without inefficient high-heat surges associated with single-speed gas furnaces.

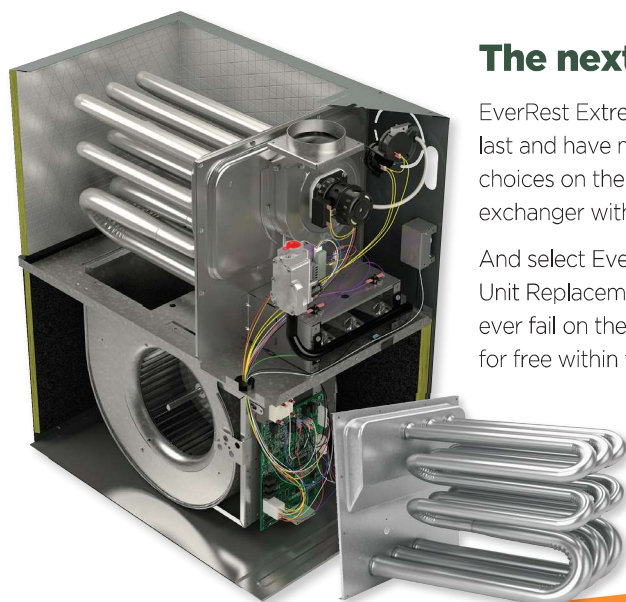

The EverRest Extreme Comfort GMVC8 Energy-Efficient Gas Furnace advantages include:

- **Two-Stage Gas Valve** - Reduces energy needed during moderate demand to deliver outstanding comfort and efficiency compared to single-stage gas valves.
- **ComfortBridge™ Technology** - When paired with a compatible outdoor unit, ComfortBridge's off-the-wall communicating technology constantly monitors the performance of a heating and cooling system. ComfortBridge technology works with any single-stage thermostat to help create customized indoor comfort for you and your family.
- **The CoolCloud™ HVAC App** - Enables qualified technicians to connect, configure and diagnose select HVAC systems quickly and accurately.
- **Efficient and Quiet Variable-Speed ECM Blower Motor** - Provides quiet system startup and shutdown with highly efficient performance.

* Complete warranty details are available from your local dealer or at www.everrestextreme.com. To receive the 10-Year Unit Replacement Heat Exchanger Limited Warranty, Lifetime Heat Exchanger Limited Warranty (good for as long as you own your home), and 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.

The next step in home comfort.

EverRest Extreme Comfort brand energy-efficient gas furnaces are built to last and have many features that make these gas furnaces one of the best choices on the market today. Our industry-leading aluminized, tubular heat exchanger with wrinkle-bend technology is the next step in home comfort.

And select EverRest brand energy-efficient gas furnaces come with a 10-Year Unit Replacement Limited Warranty. Should the heat exchanger on this unit ever fail on the original, registered homeowner, a new unit will be provided for free within the first 10-years of ownership.

Reliability and Performance You Can Trust

Relax, with the EverRest Extreme Comfort, reliable, long-lasting product performance is our top priority. Through rigorous quality assurance scrutiny, superior craftsmanship and world-class manufacturing processes, we make sure that each EverRest Extreme Comfort product is the best it can be.

The security of the EverRest brand's amazing, limited warranties*

When you choose the EverRest Extreme Comfort brand, you can rest assured that you'll receive a refreshingly affordable product that's covered by what many consider to be the best product warranties in the heating and cooling industry. Most of our gas furnace products feature a 10-Year Unit Replacement Limited Warranty, while all include a Lifetime Heat Exchanger Limited Warranty and a 10-Year Parts Limited Warranty. Together, these warranties offer homeowners a high level of purchase protection.

AsureSM
EXTENDED SERVICE PLAN

For even greater peace of mind, consider an affordable AsureSM Parts and/or Labor Extended Service Plan for your entire EverRest brand HVAC system. Ask your dealer or visit our website at www.everrestextreme.com for full details.

ComfortBridgeTM technology

When paired with the EverRest GMVC80 or GCVC80, ComfortBridge's off-the-wall communicating technology constantly monitors the performance of a heating and cooling system. ComfortBridge technology gathers data to make automatic adjustments, as needed, to use the minimum amount of energy required to create consistent and comfortable indoor heating and cooling. Rather than installing the communications technology circuit board in the thermostat (which is connected to an inside wall in a home), the ComfortBridge circuit board is securely installed in the indoor unit of the energy-efficient heating and cooling system. ComfortBridge technology works with any single-stage thermostat to help create customized indoor comfort for you and your family.
