Energy-Efficient **Packaged Units**

Up to 15.2 SEER Performance

Reliability and Performance You Can Trust

Experience reliable indoor home comfort year after year.

Many have discovered that a reliable and energy-efficient home comfort system doesn't have to cost a fortune. EverRest brand whole-house systems feature many of the latest and greatest money-saving technology benefits we can offer. They are designed and engineered to run quietly and pretty much worry-free.

- **Comforting Craftsmanship** – Innovative engineering, world-class manufacturing processes and the relentless drive to ensure each unit lives up to our uncompromising standards—these attributes define the EverRest Elite brand. Assembled in facilities in Texas, EverRest Extreme Comfort packaged units are built to last and last and last.
- **All-Aluminum Evaporator Coil** – A single metal solution that is designed for enhanced durability and performance.
- **Efficient Cooling Capacity** – Five millimeter (select models) refrigeration grade premium copper tubing and aluminum fin condenser coil configuration delivers outstanding heat transfer properties.
- **Quiet Comfort** – With a fully-insulated blower compartment, your EverRest Extreme Comfort Packaged Unit will provide you with years of quiet operation. Panels are conveniently located for easy maintenance access.
- **Heavy-Gauge Galvanized Steel Enclosure with Powder-Paint Finish** – Protects your system from extreme outdoor elements.

An enhanced level of comfort before and after your purchase

Choose an EverRest Extreme Comfort Packaged Gas/Electric Unit with confidence, knowing you're getting world-class engineering and American craftsmanship.

Component upgrades offer better performance

An EverRest Extreme Comfort Packaged Heat Pump Unit features an aluminized steel tubular primary heat exchanger that is likely the most essential component in a packaged unit's performance. This distinctive heat exchanger employs wrinkle-bend technology to deliver extraordinary durability and long-term reliability.

Two-Stage Gas Valve – Some models include two-stage gas valves, reducing energy needed during moderate demand and delivering outstanding comfort and efficiency compared to single-stage gas valves.

Dual fuel equals dual savings

When correctly installed and configured, an EverRest Extreme Comfort Dual-Fuel Packaged Heat Pump System can determine whether heating your home using electricity or natural gas is more economical. The GPDM3 dual-fuel packaged system offers an incredible combination of indoor comfort and energy-efficient performance every month of the year.

When the thermostat calls for cooling performance, the heat pump in this unit functions just like a central air conditioner keeping you cool and comfortable even on the hottest summer days. In the months when you need moderate heating output, the heat pump automatically reverses the refrigerant flow to provide warm air in your home. And on the coldest days of winter, the gas furnace in this packaged unit offers reliable, consistent heat.

You'd be hard-pressed to find a better compressor

Smart Speed™ Technology – Your EverRest GPDM5 and GPHM5 Extreme Comfort Packaged two-stage compressor models are designed to automatically adjust the compressor's speed and condensing fan motor based on cooling demand – full, 100% capacity for extreme temperatures, and reduced capacity for milder days. A system with Smart Speed technology may lower your energy costs compared to a single-speed unit that only runs at 100% capacity.

FAN MOTOR TECHNOLOGY

Reliability and Performance You Can Trust

Relax, with the EverRest Extreme Comfort, reliable, long-lasting product performance is our top priority. Through rigorous quality assurance scrutiny, superior craftsmanship and world-class manufacturing processes, we make sure that each EverRest Extreme Comfort product is the best it can be.

Efficiency and longevity make this the total package

When you choose the energy-efficient EverRest brand Packaged Heat Pump, you'll enjoy years of cost-effective, worry-free indoor comfort from a single, self-contained unit. This product is easy to install and includes two major component limited warranties for added protection. It delivers a high 15.2 Seasonal Energy Efficiency Ratio (SEER2) and a 6.7 Heating Seasonal Performance Factor (HSPF2).

Energy Efficiency

Energy efficiency equates to cost savings. An EverRest Extreme Comfort brand Packaged Unit offers up to 15.2 SEER2 performance during the summer months. "SEER2" stands for Seasonal Energy Efficiency Ratio, a measure used by the U.S. Department of Energy to rate the cooling efficiency of air conditioners and heat pumps. The higher the SEER2, the greater the efficiency—and the lower the operating costs.

Compared to lower SEER2 rated units, an EverRest brand Packaged Unit can provide significant savings on your electric bill.

Premium Durability and Efficiency

Compare the features and benefits of an EverRest Extreme Comfort packed unit systems — with most providing both cooling and heating indoor comfort from a single unit — and you'll discover why more and more homeowners choose the EverRest brand.
