14 SEER ▪ 95% AFUE ▪ GAS/ELECTRIC PACKAGED PRODUCTS

MAYTAG® M1200 EXTRA-HIGH EFFICIENCY

14 SEER/95% AFUE TWO-STAGE GAS/ELECTRIC PACKAGED SYSTEMS, 2-5 TONS

Maytag has raised the bar on energy efficiency with the 14 SEER/95% AFUE gas/electric packaged system. Most other packaged systems achieve only 80% AFUE or a little higher. Our Maytag® system reaches an unprecedented efficiency level of 95% AFUE, potentially saving you hundreds of dollars on your gas bill every winter.

AFUE measures the amount of heat actually delivered to your house compared to the amount of fuel that you must supply. Thus, a gas/electric packaged system that has an 80% AFUE rating

converts 80% of the fuel that you supply to heat – the other 20% is lost out of the chimney. The higher the number, the more efficiently your system operates.

For example, the 95% AFUE rating, which means that the gas/electric packaged system functions at or above 95% efficiency, is the highest rating available on packaged systems today.

TWO-STAGE, HEATING TECHNOLOGY

Maytag, the name that stands for reliability and dependability, offers you the perfect choice for consistent home comfort.

Let cold winds blow outside, because your Maytag® packaged system will provide a consistent temperature while improving comfort. The two-stage, heating technology works at a higher capacity on colder days or lower capacity on mild days to improve air circulation and minimize indoor temperature variations.

If installed in SCAQMD only: These gas/electric packaged systems do not meet the SCAQMD Rule 1111 14 ng/J NOx emission limit (14 ng/J), and thus are subject to a mitigation fee of up to \$450. These gas/electric packaged systems are not eligible for the Clean Air Furnace Rebate Program: www.CleanAirFurnaceRebate.com.

DURABILITY AND STYLE

Maytag® packaged systems feature polyester, urethane-coated galvanized steel with a 950-hour salt spray finish, which protects the unit from corrosion 50% better than other coatings.

QUIET COMFORT

The high-efficiency condenser motor and fan blades provide quiet operation and low vibration.

COIL TECHNOLOGY

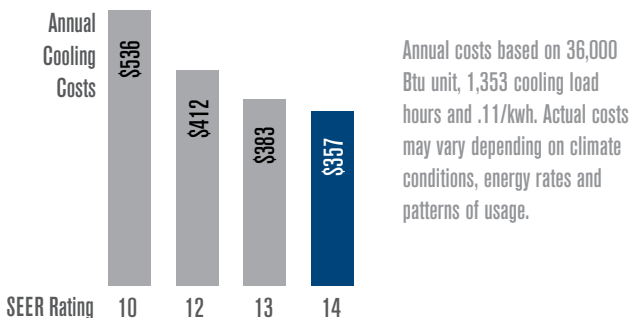

All packaged systems feature enhanced coils for increased resistance to corrosion.

When you add a Maytag® two-stage packaged system to your home, you invest in comfort and worry-free performance for years to come. All Maytag® packaged systems are quality checked and computer run-tested for performance at the manufacturing facility. Plus all Maytag® gas/electric packaged systems feature a limited lifetime heat exchanger warranty.

ENERGY SAVING

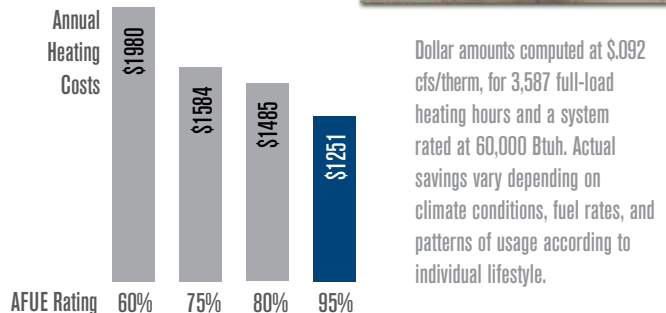

Maytag® packaged systems are rated in both Seasonal Energy Efficiency Ratio (SEER) and Annual Fuel Utilization Efficiency (AFUE). Simply put, SEER measures the unit's cooling efficiency, and AFUE measures the unit's heating efficiency. In both cases, the higher the numbers, the more efficient the unit and the more money you'll save on energy.

ADVANCED TECHNOLOGY

On Maytag® gas/electric packaged systems, the SmartStart® control board learns the igniter's heat-up characteristics. It then adapts the ignition time to the packaged systems characteristics, resulting in extending the life of the igniter.

The SmartStart control board contains a program that varies the igniter heat-up time interval. It learns the heat-up characteristics of the igniter in the packaged systems by searching for the threshold of ignition failure. It then adjusts the heat-up interval on the next trial accordingly. This is accomplished by microchip software programming.

PEACE OF MIND

This Maytag® series of products offer a 12-Year Worry-Free Limited Warranty on parts and a Limited Lifetime Heat Exchanger Warranty on gas/electric packaged systems when the product is registered.*

Plus, our Dependability Promise states that your entire unit will be replaced if the compressor or heat exchanger fails within the first 12 years of purchase, registration required.*

*Applicable to the original owner.

Ask your select Maytag® heating and cooling contractor or visit us at www.maytagvac.com for warranty details.

MAYTAG® COMFORT ACCESSORIES

Maytag offers whole-home indoor air quality solutions to reduce dust, mold, household allergens, and more through Partners Choice®. From hot and cold spots, to improving indoor air moisture levels, or simply controlling room temperatures through program thermostats and zoning problems, Maytag has a solution. And, accessories are covered by a 12-year limited parts warranty when installed and registered with your new Maytag® packaged system.
