PROVIDING
**COMFORT,
QUALITY**
AND WORRY-FREE PERFORMANCE

M120 14 & 16 SEER PACKAGED SYSTEM
AIR CONDITIONER & HEAT PUMP PRODUCTS

ENERGY SAVING

Besides reliable comfort, a new Maytag® M120 system will cost less to operate compared to older, less efficient systems. Your packaged air conditioner or heat pump's energy efficiency, rated in Seasonal Energy Efficiency Ratio (SEER), measures how efficiently the unit cools your home. The higher the SEER rating, the more efficiently your unit will perform. Heat pumps have an additional rating called Heating Seasonal Performance Factor. HSPF measures the average number of Btuh of heat delivered for every Watt-hour of electricity used by the heat pump during the heating season.

When your packaged air conditioner or heat pump is sized and installed properly, you can save more money on your energy bills than with older, less efficient units.

Annual costs based on 36,000 Btu unit, 1,500 cooling load hours and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

QUIET COMFORT

The high-efficiency fan blades and condenser motor ensure quiet operation and low vibration.

INNOVATION & STYLE

The protective paint finish resists corrosion 50% better than comparable units. The corrosion-resistant drain pan quickly and efficiently drains condensation from the evaporator. The wire guard coated with earth-friendly epoxy and mesh hail guard protect against damage from yard hazards.

ADVANCED TECHNOLOGY

These packaged air conditioner and heat pump models feature enhanced all-aluminum Micro-Channel evaporator and condenser coils. These coils reduce unit weight and require less refrigerant than traditional coils. The 14 SEER small footprint & 16 SEER heat pumps have a patented hot gas defrost for worry-free operation.

ENERGY STAR®

Certification is awarded to products designed to reduce energy consumption and utility costs. To qualify, packaged air conditioners and heat pumps must have a SEER rating of 15.0 or higher and an EER of 12.0 or higher. Heat pumps must have a HSPF rating of 8.2 or higher.

WHAT'S INSIDE MATTERS®

These M120 Series of products feature a 12-Year Limited Warranty on parts and a limited lifetime heat exchanger warranty when the product is registered.* Plus, our Dependability Promise states that your entire unit will be replaced if the compressor fails within the first year of purchase.* Ask your select Maytag® heating and cooling contractor for details or visit us at maytagvac.com.

You have enough difficult choices to make besides choosing an air conditioner or heat pump, so make your life easier by selecting the name you already know and trust: Maytag. When you purchase a Maytag® packaged air conditioner or heat pump, you will join the millions of families who have depended on Maytag® products for more than 100 years. And true to form, Maytag has coupled its products with one of the best warranties available in the industry.

Select products feature a two-stage technology which allows your packaged air conditioner or heat pump to operate at the most efficient level for total indoor comfort regardless of the outside temperature.

Maytag® packaged air conditioners and heat pumps provide you with reliable, year-round comfort and include all the components necessary to heat and/or cool your home in one, convenient unit.

iHybrid® An iHybrid® packaged system combines the convenient electric heating and cooling of a heat pump with the energy-efficient gas heat of a furnace, all in one space-saving outdoor unit. Ask your Maytag® contractor if an iHybrid system is the best solution for your home.

*Registration required. Applicable to the original owner.

TOTAL COMFORT

CREATING TOTAL INDOOR COMFORT

A new comfort system can provide more than energy efficiency. Compatible whole-home indoor solutions address specific needs and can improve your indoor living experience. There are solutions for indoor allergens, humidity control and even room temperature control. Be sure to tell your contractor about any specific comfort issues you would like to resolve.

The following system components can improve indoor air quality and help ensure the performance of your packaged unit.

ACCESSORIES*

Programmable Thermostats: The thermostat automatically adjusts your indoor temperature to accommodate both your home and away schedules, thereby reducing energy costs.

UV Air Treatment Systems: UV object purifiers and Photo Catalytic Oxidation (PCO) units remove mold, bacteria, and viruses that are found in the air stream and odors from the home.

Humidifiers: Climates with dry air can irritate your skin and trigger allergies, as well as cause furniture and dry wall to crack. A whole-house humidifier helps maintain appropriate moisture levels within your home.

Electronic Air Cleaners: Improve indoor air filtration with an electronic air cleaner that can remove 95% of household allergens, such as dust mites, pollen and smoke.

For more information about these and other accessory products, please consult your select Maytag® heating and cooling contractor.

* All accessories that are purchased and installed with a complete Maytag® system are covered by the system warranty, when registered. Any maintenance parts of accessories are not covered under warranty. (eg. Filters, etc.)
