AFUE

WARMTH

since 1914

SINCE 1914, WE'VE BEEN DELIVERING ON OUR PROMISE TO CREATE SENSIBLE, AFFORDABLE PRODUCTS THAT DO WHAT YOU NEED THEM TO WHEN YOU NEED THEM TO. BECAUSE THE BOTTOM LINE IS YOU JUST NEED A FURNACE – AN APPLIANCE TO HEAT YOUR HOME WITH GREAT EFFICIENCY. HOMEOWNERS WHO CHOOSE PAYNE ARE DELIGHTED IN THEIR DECISION BECAUSE IT IS SUCH A SENSIBLE CHOICE THAT CAN SAVE THEM MONEY AT THE PURCHASE, AND KEEPS PERFORMING WINTER AFTER WINTER.

Right for you.

OUR PROMISES

The Well-Built Warranty.

Every furnace we build is covered with a 10-year parts limited warranty to the original owner of the properly registered product.* The heat exchanger is covered by a 20-year parts limited warranty.

Run-tested and right for you.

Because we only feel comfortable providing you with long-lasting comfort and efficiency, only products that complete our testing with a 100% success rate make it out of the factory.

WHAT IS AFUE?

Like a car's mpg, AFUE (Annual Fuel Utilization Efficiency) is the measure of fuel efficiency for a furnace. It tells you what percentage of consumed heating fuel, on average, actually goes to heating your home. The higher the number the better, because when you waste fuel, you waste money.

Example: For each \$1.00 of heating fuel that the Payne PG80VTL furnace uses, up to 80% (or up to \$.80) of it is used, on average, to actually heat your home.

*Warranty period is 5 years if not registered within 90 days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts limited warranty. See warranty certificate at payne.com for complete details, terms and exclusions.

PEACE OF MIND

When you purchase Payne® products, you will soon find out why they are right for you. Our furnaces aren't just affordable — they're built to perform.

VARIABLE-SPEED

The PG80VTL features a variable-speed motor. This technology can help save you money year-round on utility bills while being extremely quiet. Saving money never sounded so good.

- 1 Efficiency that lasts** — Our 80% AFUE furnaces can save money on operation compared to older, less-efficient models. And Payne stands behind their reliable performance, season after season. The heat exchanger, for example, is specially designed for lasting corrosion resistance and durability.
- 2 Reliability** — The hot surface igniter is built so you can count on heating when you need it.
- 3 Responsiveness** — We did get a little fancy with our advanced electronic control for reliable activation and continuous monitoring of the system.
- 4 Motor options** — The broader the spectrum of speeds a motor can accommodate, the more efficiently and quietly the furnace can heat and circulate the air. We offer furnaces with standard, multi-speed and variable-speed motors.

OUR 80% GAS FURNACES

- Variable-speed motor
- Two-stage gas valve
- Multi-poise installation
- Low NOx California model

PG80VTL

80%
AFUE

- Energy efficient, multi-speed motor
- Single-stage gas valve
- Multi-poise installation

PG80ESA
