STEALTH PRO LINE

TRIDENT PRO LINE

HOW IT WORKS | TRADITIONAL OPERATION

1 Your open window brings in fresh, natural air.

2 QuietCool fans draw cool air through your home into the attic through ceiling mounted grilles.

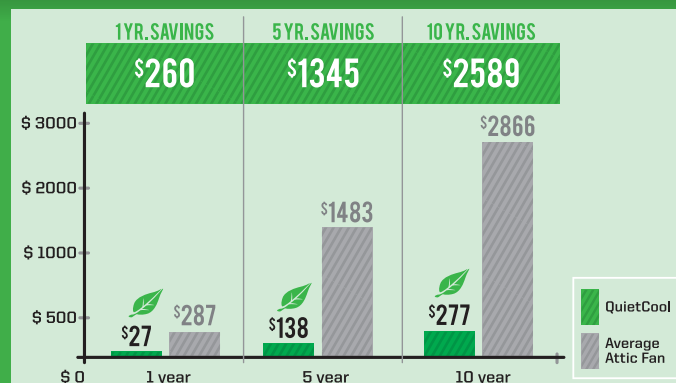

3 Patented, whisper quiet, ducted design allows to suspend in attic — keeping noise & vibration out of your living space.

4 Hot attic air is forced outside through vents.

ATTIC/GARAGE FAN SAVINGS COMPARISON

QUIETCOOL CUSTOMERS
