

Complete home comfort is within your control.

EcoNet® delivers a whole new level of comfort control, combining your heating, cooling and water heating systems into one easy to use interface. It's innovative technology that can save you money on your energy bills, with a stylish design that looks great in any home.

To learn more, contact your local contractor or visit us today at Rheem.com/EcoNet.

Designed to perform today — and tomorrow.

EcoNet works with select Rheem home comfort products offering an affordable solution that satisfies everyone's budget and lifestyle.

Connect to convenience

Control your Rheem EcoNet systems with leading mobile and tablet devices. The apps are powerful — and absolutely free.

In keeping with its policy of continuous progress & product improvement, Rheem reserves the right to make changes without notice.

The new degree of comfort.®

EcoNet® | Integrated Controls RETST600SYS

Air and water in one.

Introducing EcoNet® — the first integrated control for your home's heating, cooling and water heating systems, delivering a new level of efficiency, convenience and comfort.

Advanced technology for life's simple comforts.

Relaxing on the couch with a good book. Stretching out in a tub of soothing warm water. Life at home is full of simple comforts — and now Rheem® gives you one device for making the most of them.

Introducing EcoNet®, the first control that integrates your heating, cooling and water heating systems. Now you can enjoy total home comfort at your fingertips, with an advanced control that makes it simple to adjust temperature, set schedules, check system status and more. It's smart technology that makes it easier than ever to ensure all of your home comfort systems are working together at peak efficiency.

Engineered to perform. Designed around you.

For nearly a century, Rheem has been at the forefront of home comfort technology, offering innovative solutions that fit the way you live. EcoNet is yet another exciting innovation, delivering the efficiency and features you're looking for.

SIMPLICITY:

You won't need a phonebook-sized manual to get the most out of EcoNet. It features an attractive and intuitive interface that's easy to use.

STYLE:

Your home has its own unique style — and Rheem wants to fit right in. In addition to a sleek look and three neutral faceplate options, EcoNet lets you customize background and button colors to fit your home décor.

SAVINGS:

Heating, cooling and water heating can account for more than 65% of a home's energy use. By letting you set schedules for your air and water systems based on your lifestyle and usage needs, EcoNet makes saving more energy possible.

One control. Multiple features to love.

INTUITIVE PROGRAMMING

EcoNet features lifestyle-based scheduling for easy, intuitive system programming. Enjoy the convenience of 1-touch mode selection and 1-touch vacation mode.

SET IT & GO

After setting your desired heat and cool range, the system automatically switches between heating and cooling modes to keep the house at the desired temperature range.

CLEAN, COMFORTABLE INDOOR ENVIRONMENT

Maintain an ideal indoor environment during temperate weather by selecting continuous fan speeds that ensure even temperatures inside the house and provide continuous air filtering.

HUMIDITY CONTROL

Do it yourself with manual mode, or maintain the right humidity conditions inside your home by selecting the 'Auto' setting. This setting actively monitors internal and external conditions and automatically adjusts the relative humidity to maintain ideal comfort levels.

EASIER MONITORING AND MAINTENANCE

EcoNet can also monitor and manage the operation of various accessories connected to your HVAC system, including humidifiers, air filters, UV lights, and ventilators. When an accessory requires attention, an alert appears on the control advising them to replace.

FUTURE-FRIENDLY

EcoNet works with select Rheem home comfort products, and many more are on the way. The technology is also future friendly — designed to support connection with other home automation systems so you can take advantage of exciting new advancements in whole home control.
