

The new degree of comfort.™

Air Handlers
RHMV

COMF^oRTABLY

QUIET AND EFFICIENT

Designed with maximum energy efficiency and quiet operation, the **Rheem® EcoNet™ Enabled High-Efficiency Modulating RHMV Air Handler** gives you a higher level of comfort while keeping your utility bills low. **Now that feels comfy.**

Reduce Energy Bills

Reducing your monthly energy bills is easier than ever because the heart of the Rheem RHMV Air Handler is the high-efficiency, constant CFM, variable-speed blower motor which modulates the airflow based on cooling demand for enhanced SEER performance.

Quiet and Efficient

The sturdy design of our air handler provides excellent thermal and sound insulation, which means you get quiet and efficient comfort.

EcoNet™

This innovative technology sends you important alerts and reminders to keep your system working at its best. Plus its easy to adjust your comfort from home or away.*

We Thought of Everything... And Then Some.

Designed to keep your family comfortable for years to come, our products are developed using our 360°+1 design philosophy. We strive to deliver the very best homeowner experience by evaluating every detail of the product from every angle. That's 360°+1. And that's why you can count on Rheem air and water solutions to bring you and your family years of comfort.

The RHMV Air Handler is designed to operate with the EcoNet Smart Home System. EcoNet technology combines select Rheem Heating, Cooling and Water Heating solutions into one integrated network so you can effortlessly manage home comfort and energy usage from anywhere with the control center, free mobile app or mobile-friendly web portal.

Energy Savings The heart of an air handler is the blower motor. That's why Rheem RHMV Air Handlers feature a high-efficiency, constant CFM, variable-speed motor with modulating airflow. When the unit is matched with a two-stage or variable-speed air conditioner or heat pump, it is able to run at a lower speed the majority of the time. This provides even temperatures so there is no need to continuously adjust your thermostat, reducing your energy usage.

Humidity Control A new Rheem air handler will help manage humidity levels in the home, improving your comfort and helping you save money on energy bills.

Efficient Heating & Cooling The **1 factory-installed indoor aluminum cooling coil** is the key component for your air handler. The coil is essential to humidity control and improved system performance, and the high quality standards used in manufacturing ensures a long-lasting, reliable performance.

The Rewards of Rheem Proven Quality

Quiet Operation The Rheem RHMV air handler is designed with a **2 sturdy steel cabinet** with **3 one inch of foil-faced insulation**, offering excellent thermal and sound insulation.

Versatile Design The 4-way convertible design of Rheem air handlers allows the unit to fit in with the design of your home. An expansion valve allows the air handler to work in conjunction with either an air conditioner or heat pump. A drain pan can be used in multiple positions. Options for power connection provide installation flexibility – no matter where the unit is located in your home.

Rheem Quality The RHMV Air Handler features a new lanced fin design for maximum performance and increased efficiency. A new high-grade condensate drain pan keeps the unit operating smoothly, especially when the weather heats up. And the corrosion-resistant aluminum endplates keep your unit looking as good as it runs.
