

AIR HANDLERS
RH2V

LONG-LASTING COMFORT THAT FEELS JUST RIGHT

Depend on the **Ruud High-Efficiency RH2V Air Handler** to deliver energy-efficient comfort to your home. The unit is designed to help save you money on utility bills while quietly enhancing indoor air conditions.

RUUD.COM

RH2V SERIES

Advanced Comfort

The Ruud High-Efficiency Air Handler is performance-measured across 13 active monitoring points that deliver sustained comfort and maximum efficiency.

Reduce Energy Bills

Reducing your monthly energy bills is easier than ever because the Ruud RH2V Air Handler features a high-efficiency, variable-speed blower motor – recognized by the industry for dependable energy savings.

Reliability and Durability

Solid construction ensures quiet operation and provides quality assurance backed by a 10-year limited parts warranty.

RELY ON RUUD.™

We Thought of Everything... And Then Some.

The Ruud Air Handlers were developed using our 360°+1 design philosophy, which means every detail of the product is meticulously evaluated from every angle. We consider the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your Ruud Air Handler to bring you and your family years of comfort.

EXPERIENCE THE ADVANTAGES OF CUTTING-EDGE TECHNOLOGY

Ruud High-Efficiency Air Handlers are designed to maximize energy efficiency and minimize energy costs while delivering reliable, quiet operation that makes being home even more pleasant.

Energy Savings The heart of an air handler is the blower motor. That's why Ruud RH2V Air Handlers feature a high-efficiency, variable-speed blower motor. When the unit is matched with a two-stage air conditioner or heat pump, it is able to run at a lower speed the majority of the time. This provides even temperature, so there is no need to continuously adjust your thermostat, reducing your energy usage.

Humidity Control A new Ruud Air Handler will improve the comfort of your home by automatically adjusting the humidity level, which improves air quality and lowers static electricity levels.

Efficient Heating & Cooling Ruud Air Handlers are designed to deliver superior performance, well exceeding the standard efficiency requirements. The **1** factory-installed indoor aluminum cooling coil is the key component for your air handler. The coil is essential to humidity control and improved system performance, and the high-quality standards used in manufacturing result in fewer maintenance calls.

THE REWARDS OF RUUD QUALITY & DURABILITY

Quiet Operation With its high-efficiency, variable-speed blower motor, the Ruud High-Efficiency Air Handler is designed to slowly ramp up its speed to the most efficient performance levels, allowing for much quieter operation. Our **2** sturdy steel cabinet with **3** one inch foil-faced insulation offers excellent thermal and sound insulation.

Optional Electric Heat When a heat pump is paired with the unit, Ruud Air Handlers can also provide efficient heating for your home. An optional electric heater kit can be added to keep you warm all winter long.

Simple Service Ruud Air Handlers have been engineered to provide your technician easy access to all internal components, helping any service time stay short and simple.

Ruud Quality The RH2V Air Handler features a new lanced fin design for maximum performance and increased efficiency. A new high-grade condensate drain pan keeps the unit operating smoothly, especially when the weather heats up. And the corrosion-resistant aluminum endplates keep your unit looking as good as it runs.
