MODEL: SA17 AIR CONDITIONER

Legendary Two-Stage Copeland Scroll™ UltraTech™ compressor makes the SA17 as efficient as it is durable. A single-stage unit runs at one speed, but the Two-Stage SA17 modulates between two speeds – high and medium. It will operate on medium speed most of the time, providing more precise temperature and lower humidity while also reducing energy use. The system only operates on high when necessary during peak, warm weather conditions. The compressor also has 70% fewer moving parts – which means you get a unit that’s more efficient and durable. The optimized fan orifice contributes to quieter operation, optimal airflow and better overall performance.

A quieter, more durable unit starts with our new composite base pan. The design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure that the base pan stays black for years to come. Our improved refrigerant tubing design also contributes to a quieter operation. For added strength, the wire grille on the exterior does an outstanding job protecting the inside.

A visually appealing cabinet design means our air conditioners look as good as they operate. Plus the powder coat paint system provides a lasting professional finish.

Sure Comfort® is a new name in home comfort offering tried and true air conditioners, heat pumps, furnaces and air handlers and package units to meet the needs of your family and your budget. With advanced features, impressive performance and great warranties that all come standard, you can enjoy solutions that keep your family comfortable every day.
