MODEL: RGEA15 PACKAGE GAS ELECTRIC UNITS

Efficient Operation and greater comfort is what you'll get with the RGEA15. Designed with a micro-channel refrigerant system that includes all-aluminum evaporator and condenser coils. These coils fight corrosion and keep your unit operating like a pro. Micro-channel design is also responsible for superior heat transfer capabilities and uses up to 58% less refrigerant than standard copper tube aluminum fin coil models.

Quality and Durability are built into the RGEA15. The unique water management design diverts water away from the critical components of your unit, preventing leaks and other potential problems. The louvered coil protection prevents damage to the coil fin, which keeps the coil running longer for a better overall performance. And for unmatched durability, our direct spark ignition with remote flame sensing provides unmatched reliability for years of worry-free operation.

Quieter operation is attributed to several design features of the RGEA15. A durable cabinet combined with our scroll compressor and an elevated base pan helps reduce noise for comfort that's as quiet as it is durable.

Sure Comfort® is a new name in home comfort offering tried and true air conditioners, heat pumps, furnaces and air handlers and package units to meet the needs of your family and your budget. With advanced features, impressive performance and great warranties that all come standard, you can enjoy solutions that keep your family comfortable every day.
