HxTM3 Communicating Zoning System

What is communicating zoning?

Communicating zoning enables you to achieve the ultimate in quiet comfort and efficiency. This is especially important now we are all spending more time at home.

By combining our award-winning variable capacity premium efficiency units with QuietDrive™ technology and our Hx™3 communicating thermostats and sensors, you have the ability to minimize temperature swings in those rooms farther away from the primary thermostat, as well as set and consistently maintain different conditions in different rooms in your home if you desire.

Unlike with conventional systems, you no longer need to contend with a hot or cold room above a garage or in a basement. You can also minimize debate between family members who have varying sleeping preferences by providing each with their own desired room conditions.

All the components of a communicating zoning system talk to each other. This enables the entire HVAC system to operate automatically and most effectively to maintain the desired space conditions without you having to make ongoing adjustments. By minimizing temperature swings and the energy required to overcome them, these systems also provide the most efficient operation to maintain your comfort.

It's all about treating your home as it is used - with different spaces having different heating and cooling needs.

The ideal solution for the new generation of smart homes

The innovative Hx™3 Communicating Zoning System is designed to deliver safe, reliable, convenient comfort at the peak of efficiency.

- **Up to eight zones** available for custom control.
- **Partners with award-winning premium efficiency**
YORK® HVAC equipment with QuietDrive™ technology and a full range of Indoor Air Quality products.
- **Ultimate control at your fingertips** – whether you are at home or away, manage your system with the Hx™ Thermostat App.
- **Voice control** using Amazon Alexa.
- **Apple Watch** compatible.
- **Exterior and remote monitoring** along with automatic Wi-Fi-enabled system updates help keep your system running efficiently and eliminate the need for in-home visits.
- **Compatible with any existing power** on/off damper to reduce changes to existing ductwork.
- **5-year** Parts Limited Warranty and qualifies for 10-year extended warranty.*

*If registered as "system" with the HVAC equipment.

Flexibility to meet your needs

OPT FOR ANY COMBINATION OF SECONDARY ZONE SENSORS
AND THERMOSTATS FOR A SYSTEM THAT'S RIGHT FOR YOU

ZONE MODULE

Central hub that allows communication from the main controller to the other stats/sensors of the system, the HVAC equipment, and dampers.

- Compatible with any 3-wire 24V power on/off damper
- Up five dampers per zone
- 3" digital display for system configuration

Hx™3 MAIN CONTROLLER (ZONE 1)

Hx™3 zone thermostat acts as the primary controls point for the entire home and zone 1 controller. It partners with additional secondary thermostats or sensors to enable control of the remaining zones.

- Acts as the primary touchscreen interface with the system
- 4.3" digital color touchscreen
- Provides whole home control – customize schedules for up to eight individual zones
- Seven-day programmable for all zones – view and edit modes and setpoints
- Advanced settings such as humidity control, geo-fencing, vacation and away modes for individual zone or whole home
- Wi-Fi-enabled for automatic updates
- Ability to set and adjust airflows for each zone

SECONDARY SENSORS (ZONES 2-8)

Hx™3 Zone Thermostat:

- 4.3" digital color touchscreen
- Temperature and humidity control
- View and edit individual zone settings and schedule (copy, custom, away, vacation)
- Visibility to other zone system settings

or

Hx™3 Compact Zone Thermostat:

- 2.8" digital color touchscreen
- Temperature and humidity control
- View and edit individual zone settings (heat, cool, auto, e-heat, fan)

or

Zone Sensor:

- View zone status at the Main Controller and through the Hx™ Thermostat app
- Temperature monitoring
