

YORK® residential packaged equipment

2-5 Tons

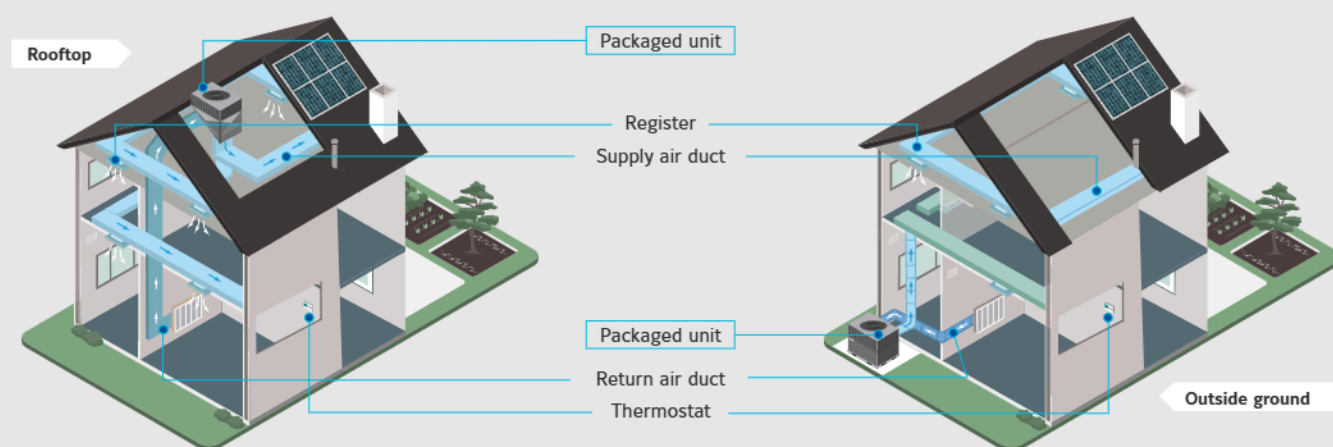

High-performance comfort, tailored to your home

YORK® Residential Packaged Equipment brings you heating and cooling functions in one self-contained unit. They're perfectly designed for rooftops or ground pads where interior space is at a premium. We offer both air conditioning and

heat pump models with gas and electric heating options. Your contractor can recommend the right size and efficiency level for your home and budget – with standard (13.4 SEER2) and high-efficiency (15.2 SEER2) options available.

Installation options

Proven quality construction

- Next-generation, high-efficiency blower delivers reduced energy consumption
- Advanced fan design and vibration-reducing technology minimize noise for peace and quiet
- Stainless-steel heat exchanger
- Durable powder-coat paint is 1,000-hour salt-spray rated and in a sleek new color

Efficient performance

- 15.2 SEER2 models meet CEE Tier 1 eligibility requirements for 25C Federal Tax Credits and other rebates/incentives
- Designed with new low global warming potential (GWP) R-454B refrigerant

Easy installation and servicing

- Single- and three-phase models available for residential and light-commercial applications
- Individual panels and front-facing components for easy access
- Convertible airflow design allows upflow, downflow or horizontal applications
- Easy-to-read, color-coded wiring diagrams

Affordable efficiency.
Advanced performance.
Industry-leading quality.
