

# Welcome to Soundtrap, Students & Families!

**What?** Soundtrap is a cloud-based recording studio that support music-making, podcasting, and audio recordings.

**Why?** To support the creativity of **every** student.

**Who?** Soundtrap can be used by students of all ages and abilities! Fantastic work is created by our youngest learners and our collage students alike.

**When?** Soundtrap is accessible from phones, tablets, or a computer. Login anytime to complete a music assignment, create a family podcast, record a ringtone, etc.

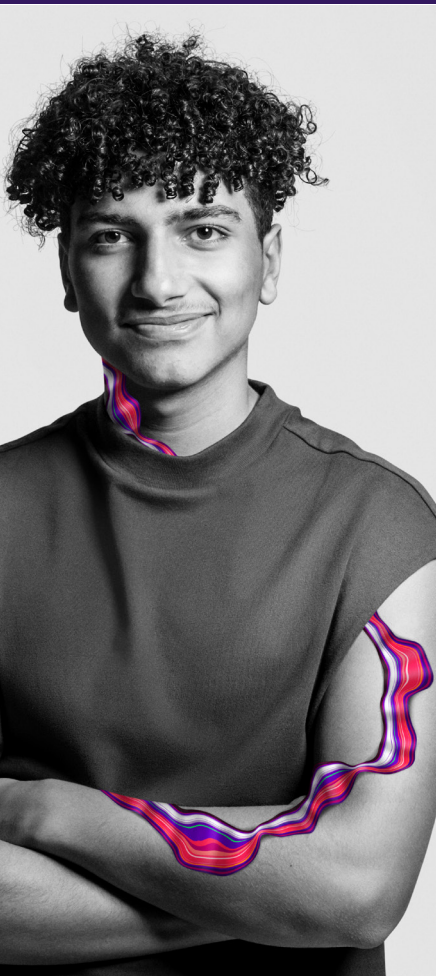

**Where?** Soundtrap has users in 200+ countries and is accessible in English, Spanish, French, German, Swedish, Portuguese, and Brazilian Portuguese.

**"Soundtrap's powerful capabilities easily supports sharing student voice through creating and collaborating in our ever-changing world."**

– Patrick Donovan, Google for Education Certified Innovator and Trainer

## Easy

Soundtrap captures high-quality sound with ease. Students can record beats, develop a podcast, and become novice audio engineers.

## Safe

Soundtrap is designed to comply with COPPA, and FERPA and provide a 'Walled Garden' feature.

## Collaborative

Students can work together on projects, get direct feedback from their teacher, and share their work with classmates through virtual performances and celebrations.

## Fun

Encourages creativity and joyful learning
