**Abstract of JP2012179345 (A)**

**PROBLEM TO BE SOLVED:** To provide a multifunctional penile extender configured on a penis traction system which essentially improves comfort in use and allows its therapeutic use in the penis curvature correction in different directions (curvatures to up, down, left and right), deviations of the penis to right and left, treatment of micro-penis, treatment of post-surgical penile retraction of urological surgeries of penis, prostate and bladder, and the penis enlargement and thickening. ; **SOLUTION:**

The multifunctional penile extender comprises at least: a first penis fastening device (100) formed by a silicone band essentially cylindrical with a flat central region and a penis support device (200) constituted by a "U" shaped piece and a plurality of holes symmetrically distributed on its surface. ; **COPYRIGHT:** (C)2012,JPO&INPIT
