FOREWORD (CONTINUED)

(5.2) A list of long term, semi-permanent substitutions in which: (a) one standard has permanently replaced another standard (military, industry, or company) or (b) military, industry, or company standard has been published but a QPL or approved source has not yet been established, or is not otherwise available; and,

(5.3) A list of deviations which are used for those conditions where: (a) drawing callout parts are not available consistent with manufacturing schedule, and substitute parts are procured or installed prior to authorization, or (b) equipment being delivered contains non-compliant, unapproved, or not fully approved drawing callout parts.

Section 6.0 provides a list of added parts, deleted parts and parts with changed remarks, in sections 3.0 through 4.4. This list is sorted by part number and is a comparison of this revision with the previous revision.
