FOREWORD (CONTINUED)

Section 1.0, of this document contains Fastener Usage Information consisting of Mechanical Parts Guidelines including Material Compatibility Tables, structural hardware design data and repair fastener information.

Section 2.0 of this document is an index by part number of the parts listed in sections 3.0 through 4.4. Refer to referenced pages for restrictions and remarks (if any) applicable to each part.

Section 3.0 of this document, General Application Parts, provides a list of Military/Industry standard parts approved without limitation for use over the entire F-16 program.

Section 4.0, Limited Application parts, provides the following:

(4.1) A list of Military/Industry standard parts approved for use with restrictions as noted under "Remarks".

(4.2) A list of Contractor/Coproducer/Subcontractor standard parts approved for use on any equipment (if there are no restrictions) of the F-16; however, each company using the part must obtain approval for their company specification control drawings for those parts.

(4.3) A list of parts requiring specification approval. Equipment utilizing these unapproved parts must be delivered on a deviation documenting the noncompliance.

(4.4) A list of cancelled parts and parts inactive for new design, which may appear in "previously" designed and deliverable equipments.

Section 5.0, Substitutions/Deviations, provides the following:

(5.1) A list of short term, time phased substitutions in which the drawing callout part is not available within manufacturing schedule and substitution authorization is obtained prior to procurement of the substitute part.
