4.7.2 Item Transportability - System elements shall be as far as practicable of such size and weight and shall include such handling, loading, securing, disassembly, and protective features that will permit shipment within equipment capabilities of available military and commercial modes. Design of shipping configurations for system elements shall be compatible with the 463L Material Handling Support System specified in MIL-A-8421.

4.7.3 Coordination - Those elements, which have such peculiar characteristics that selected modes or precautionary measures will be required to perform the transportation mission, shall be identified and coordinated with the Buyer's Traffic Department.

4.8 Packaging Design Data - All Special Design Protective Equipment (SDPE) recommendation data shall be submitted to the Buyer, (Attention: Packaging Engineering Section of the Traffic Department) on the Seller's internal packaging form or drawing format for review and concurrence.

4.9 Quality Assurance - The Seller shall provide and maintain a Quality Control System acceptable to General Dynamics to insure that all requirements of this specification have been met. Inspection records of the examination and test made on packaging integrity shall be maintained complete and made available to the Buyer's Quality Control Representative during the performance of the program and for such longer time as may be specified elsewhere in the contract. Minimum requirements for Packaging Quality Assurance are as set out in NAS 852. Test reports and packaging design data shall be made available upon request of the Buyer when required to verify package integrity.

5.0 TRANSPORTATION INSTRUCTIONS

5.1 General - This procedure establishes the requirements for effective Transportation Management of all Buyer Assets, and those Government Production Assets under both Buyer and Government control. Shipments shall be described on Bills of Lading in compliance with the proper freight classification, tariffs, rules and regulations in a manner that will result in the lowest transportation cost. Bills of Lading must be annotated to show that the shipment is released at the maximum value which applies to the lowest rate on rating provided in applicable tariffs, special tenders, quotation, or conference rates.

5.2 Terms of Delivery - Delivery terms for Buyer Assets and application of the document "Incoterms 1953" shall be as provided in the purchase order or as otherwise directed by the Buyer.
