FINISH CODE	CHANGES	PAGE
A655, A656, A657, A658, A659, A660 A661, A662, A664 A665, A666, A667 A668, A671, A673 A675, A679	Changed title and added note about the code intended for special bonding to-primer application.	126, 126, 127, 127, 127, 128, 128, 128, 129, 129, 130, 130, 130, 130, 131, 131, 132
A663	Added new finish Code	129
A669, A670	Deleted these codes. They were duplicates of other codes and were not called out on drawings.	130, 130
A671	Added word "specified" as second word in step d for agreement with way code is being used.	131
A796	Corrected step c typo error and replaced "22" with "222".	160
A853	Added new code	167
A854	Added new code	166
D418	Added new code	171
E426	Added new code	180
E427	Added new code	180
R405	Revised step b to correct typo. Changed "160" to "106" to agree with shop practice and FPS-3001.	186
R412	Added note that there is a restriction to use of code. Cadmium plating on depleted uranium ballast weights can only be performed by Atomic Energy Commission licensed facilities	188
R414 , R415	Corrected steps a and b on both. Cleaning element 119 was changed to 170 and priming element was changed from 201 to 366 for better application practices.	188, 188
