CHANGE INDEX

The following changes have been made to 16PR070 since the last revision.

Element/Code	Reason for Change
Added new finish codes A822, A823, A969-A975, S665-S668, T412	To provide new finish codes needed for various F-16 programs.
Re-added finish code T401	Inadvertently dropped from a prior revision.
Added new basic elements 408, 409, 553, 554, and 555	To support new finish code creation
Corrected finish code A813	Code was worded so that primer was not required in white painted areas
Updated finish code A801	Prior wording did not allow use of MIL-C-85285 urethane coating
Updated finish codes A476 and A478, and basic element 203	To provide finish requirements for fitting types not previously used in production
Updated basic elements involving touchup of primer	To include FMS-1058-1 as an authorized touchup primer.
