

Space Player Privacy

Space Player

This privacy policy covers the use of the 'Space Player for Android' and 'Space Player for iOS' applications.

Space Player does not collect any statistics, personal information, or analytics from our users, other than built in mechanisms that are present for all the mobile or embedded applications in their respective main distribution channels.

The mobile or embedded versions of 'Space Player' do allow for videos to be played via various network transports. Cookies are not stored at any point. Authentication credentials can be stored optionally on the user's local device upon the user's explicit request. On iOS and tvOS, authentication credentials can be shared across devices using proprietary encryption mechanisms provided by the host operating system, dubbed iCloud Keychain. Space Player does not have access to any information stored within.
