

# Our helping hands!

Finger  spaces

● Full stops

ABC Capital letters

Read it again

Cut out and laminate the hands (one for each child) and the target slips below. Every child starts with the target of including 'finger spaces' in their writing, but as they progress the additional target slips can be added to their individual hand (using Velcro).

Left-handed children can even use their laminated hand (rather than their right hand) for finger spaces as this is easier and avoids hands crossing over and getting in a tangle!!!
