

# The Lost Sheep

A shepherd had 100 fine sheep  
that he cared for very much.

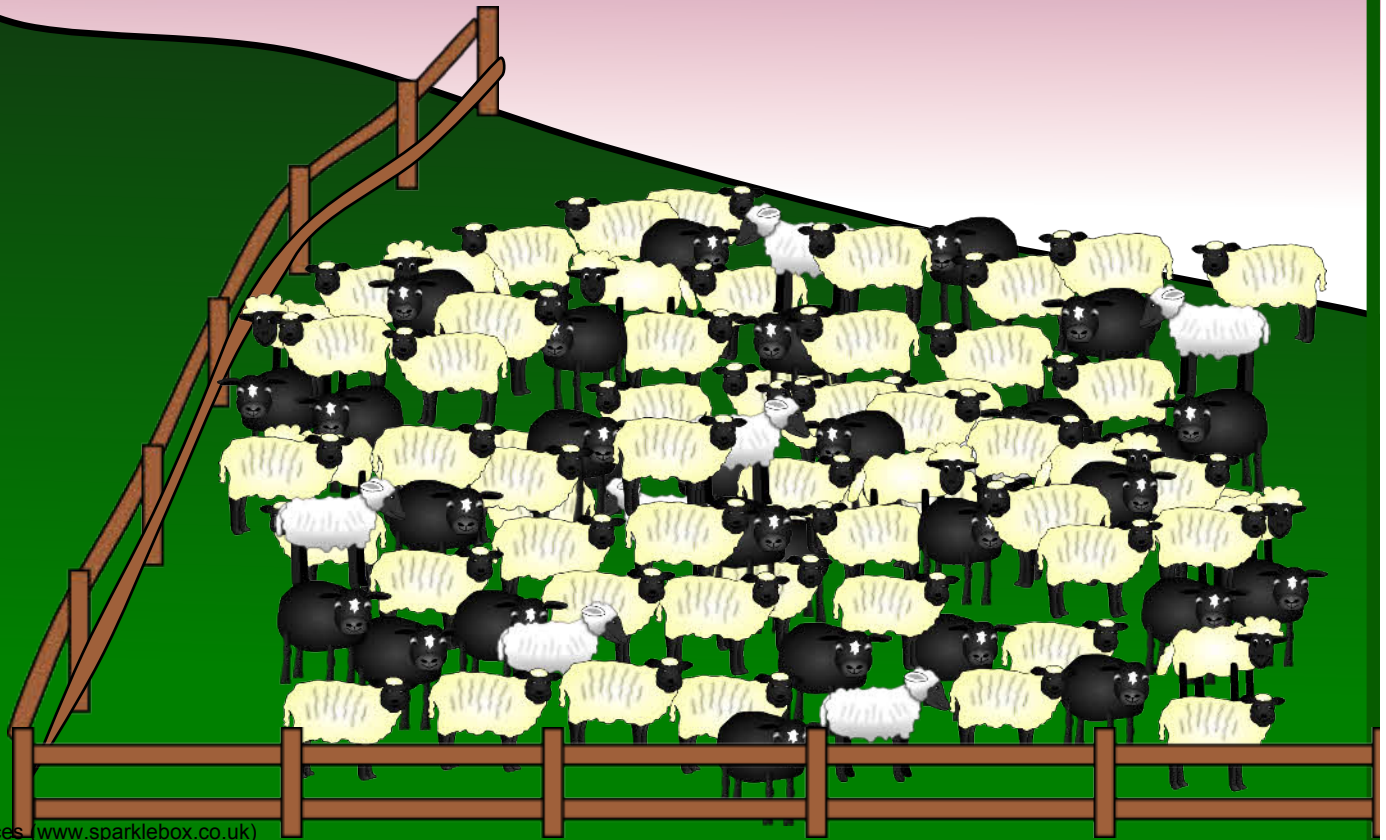

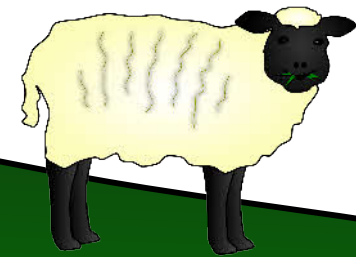

He kept watch over them in case wild animals came to attack.

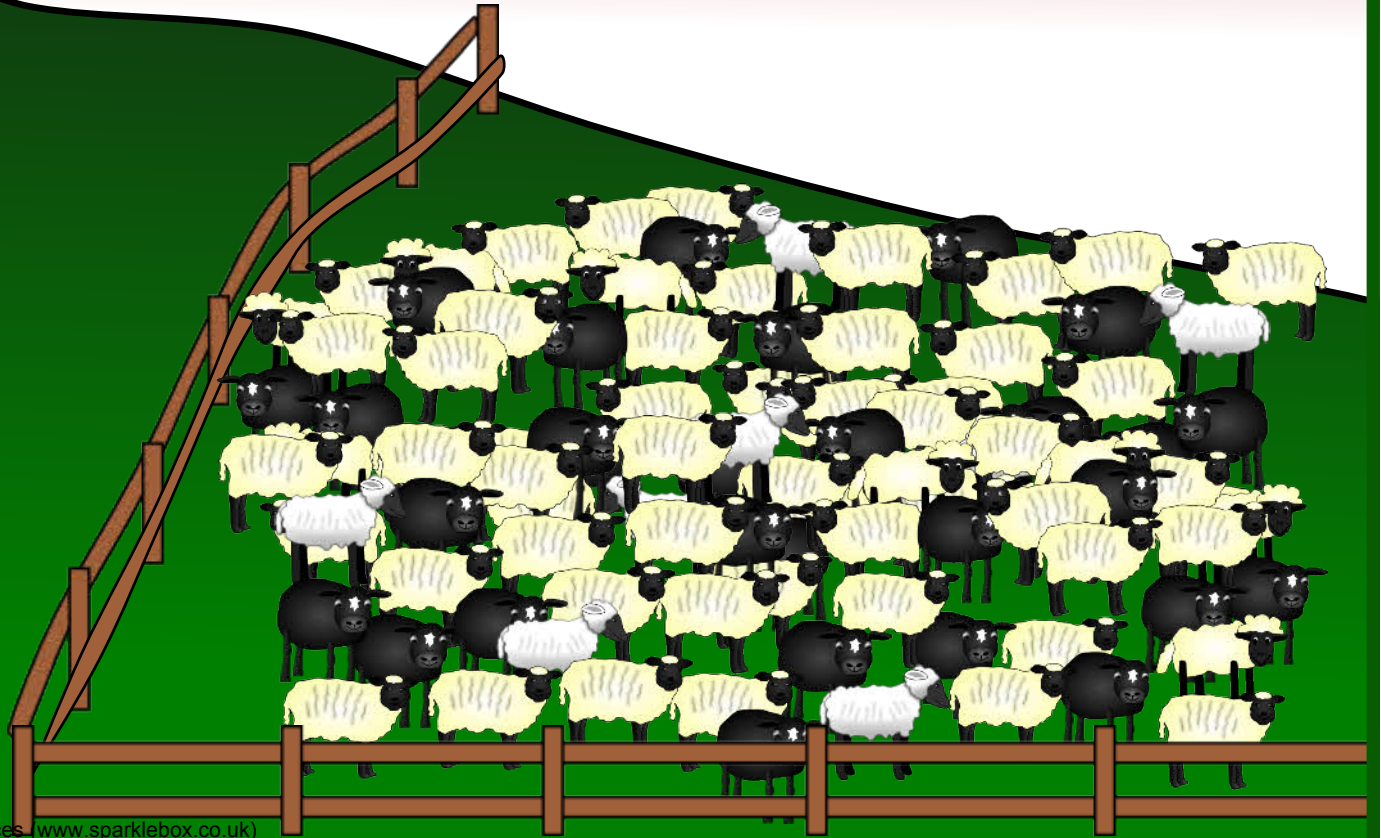

Every evening he led them back to the safety of the sheep fold and counted to check they were all there.

One sheep wandered off by itself.

That evening, when the shepherd counted, there were only 99 sheep.

The shepherd was very worried and went looking for his lost sheep.

# Where was his sheep?

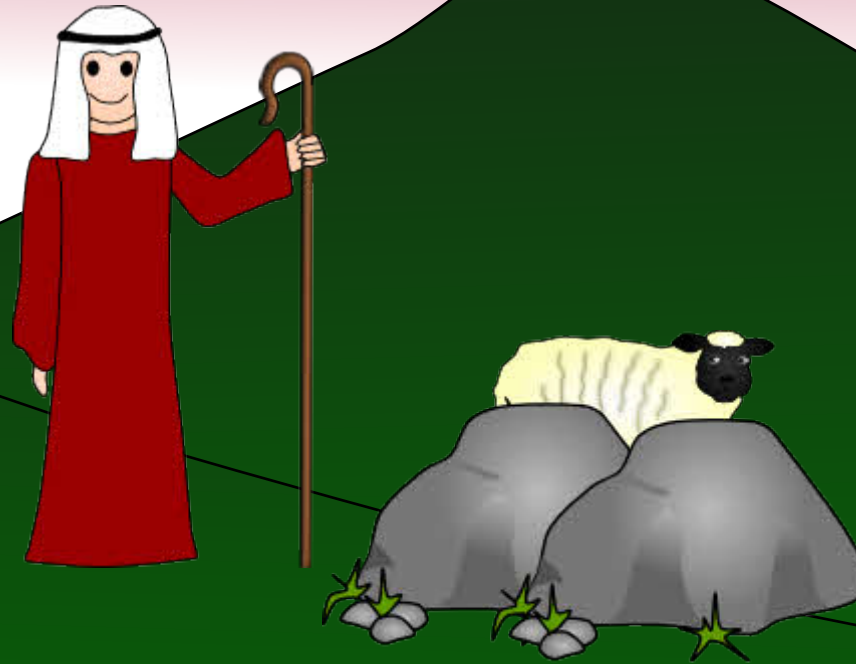

He searched and searched.

# Where was it?

And there it was! It had fallen on some rocks and was trapped.

The shepherd carried his sheep home  
and made sure it was safe.

The shepherd and his friends were so happy, they had a party to celebrate!
