

# *How to Make a* **Paper** **Aeroplane**

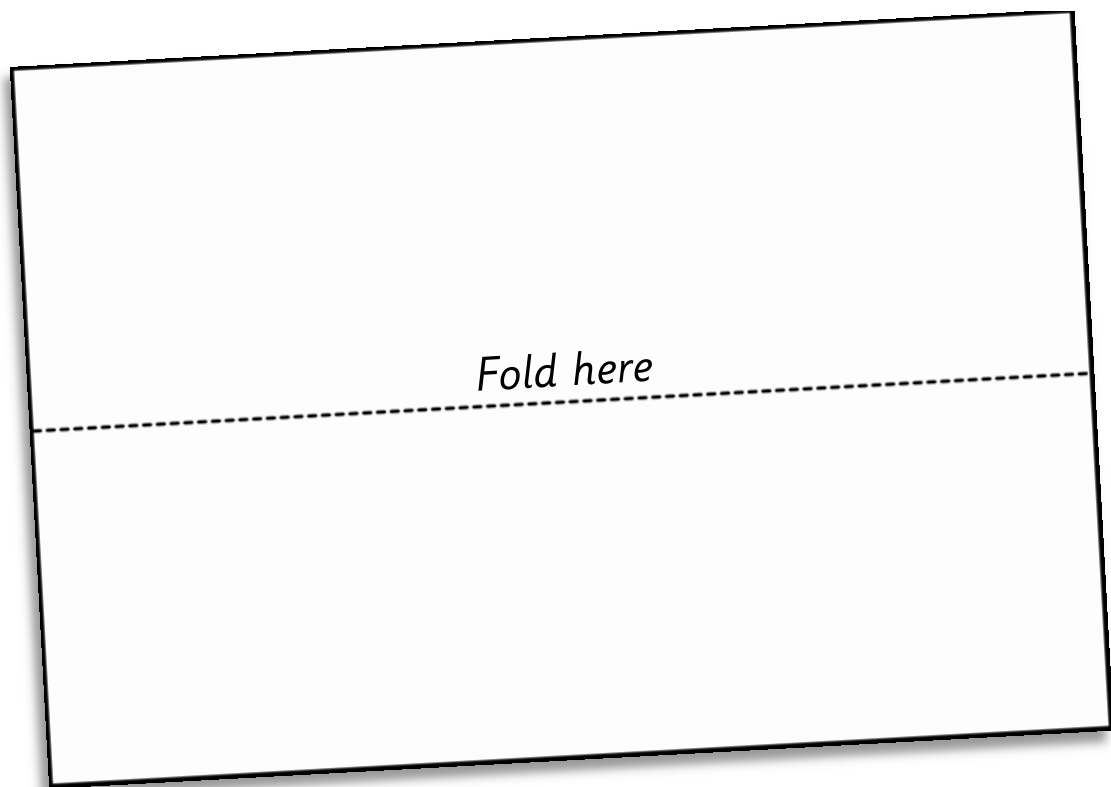

1

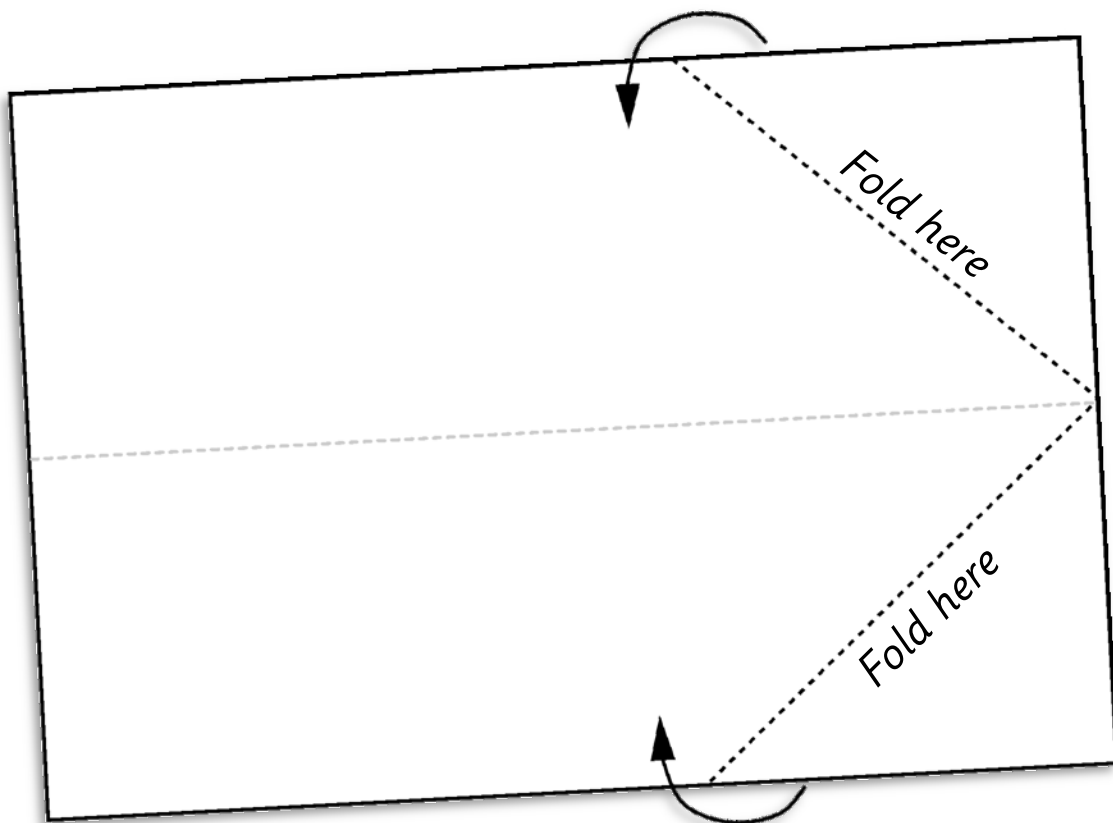

Use a sheet of A4-sized paper.

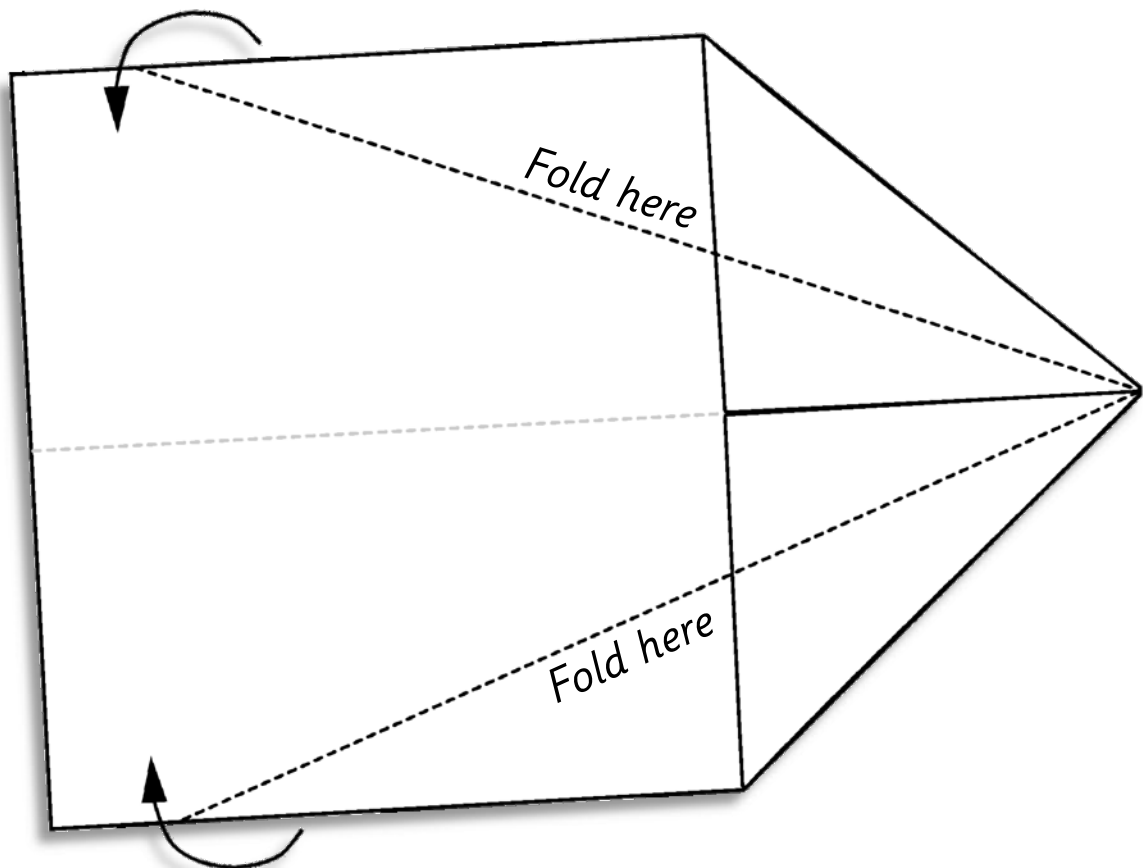

**2** Fold the paper in half long-ways to make a line in the centre. Then open it out flat.

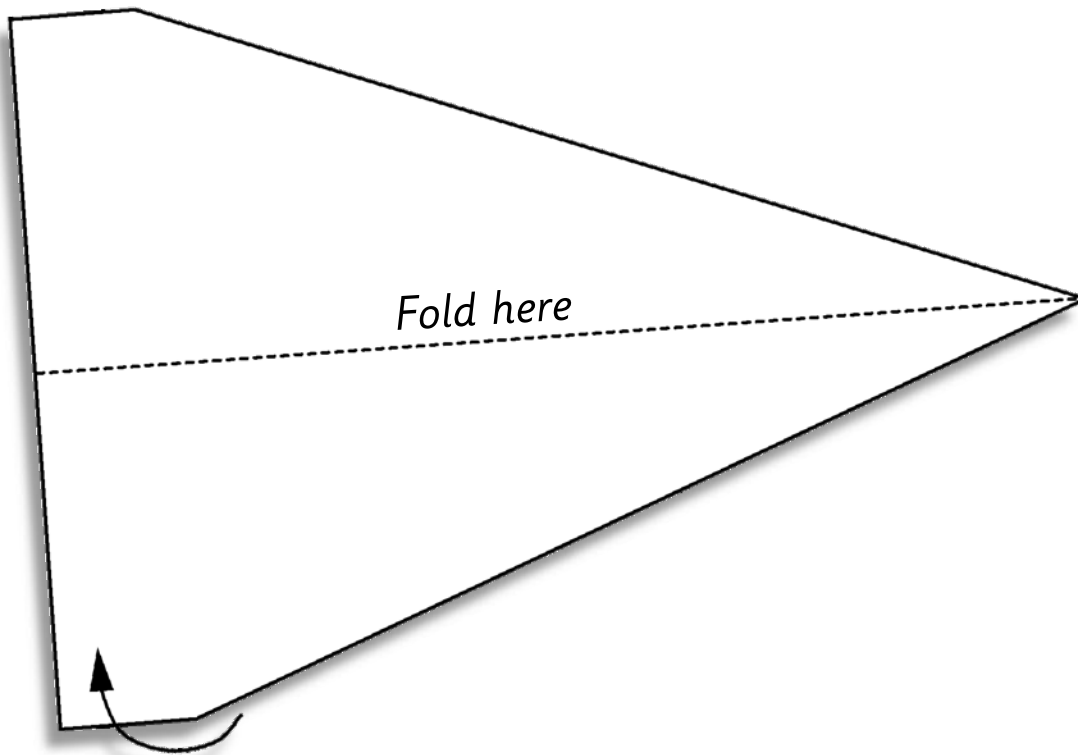

**3** Fold in two corners so that they meet at the centre fold.

**4** Fold in the outer edges again to meet in the middle.

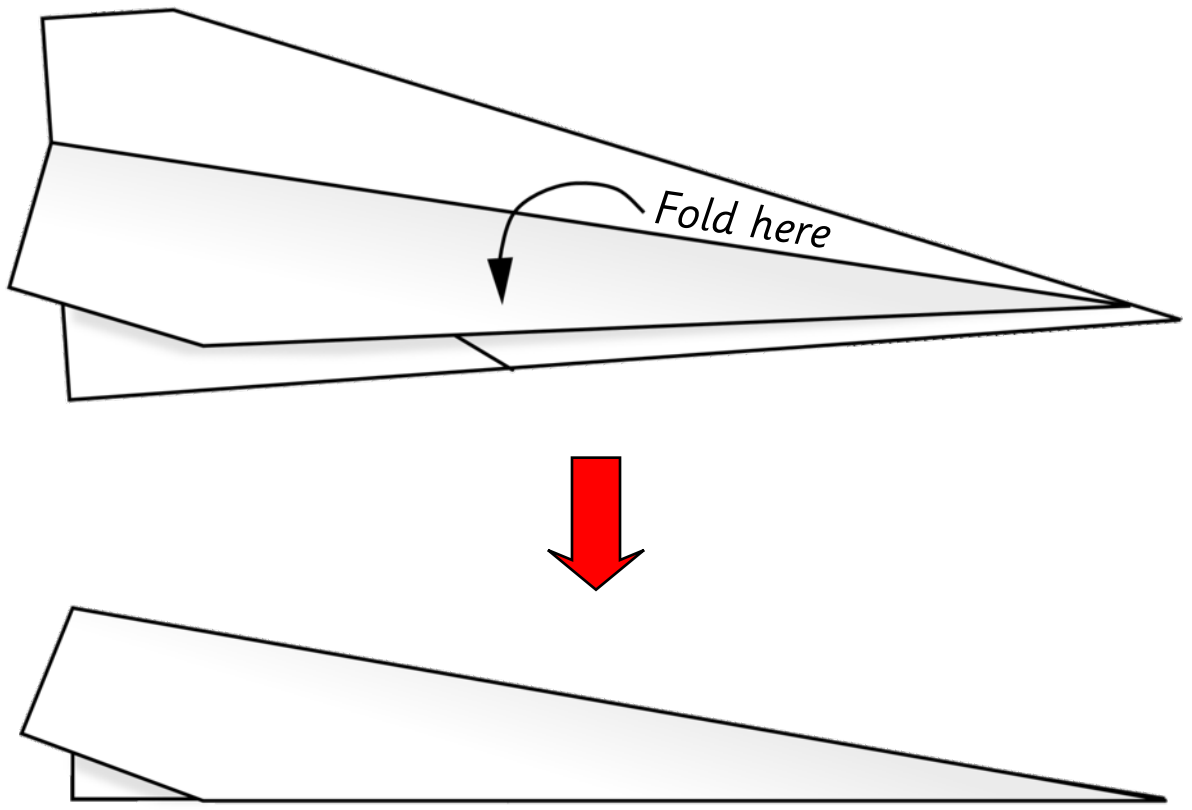

**5** Turn the paper over and fold the plane in half at the centre.

6

Fold down the wings on each side so that they align with the bottom of the plane.

7

See how far you can  
make your paper plane  
fly!
