As no two trees are identical, please note that natural timber doors may vary in colour, texture and grain pattern. Conditions in the home such as sunlight, cleaning chemicals, polishes and smoke can affect the colour of wood over time. Kitchen furniture is made up of a combination of different materials and whilst Moores do their utmost to minimise these shades variations, we are not able to guarantee totally matching colours. Commercial constraints preclude the hand selection of every component. With effect from the issue date shown until replaced by a new edition. E&OE. The colours and finishes reproduced in this catalogue may vary from the actual colours due to the limitations of the printing process.

In the interest of continuous product improvement, Moores reserve the right to alter specification as necessary.
