Environmental Fact Sheet

Water:

Environmental awareness is one of the values inspiring all operations by the Fedrigoni. Quality Management coordinates the operations of all technical structures in order to reduce the environmental importance of production activity. Close attention is paid to controlling and reducing emissions (water & air) and reducing power consumption. Water emissions from Fedrigoni Mills are within and under the strict guidelines and regulations of Italian law.

Air:

Air emissions are from methane combustion and from the drying paper process (water, steam)

Solid waste & Landfill:

90% of solid waste is allocated for recycling.

Energy Usage:

Energy usage is guided by European policy 2003/87/CE to reduce greenhouse gas emissions
