## CLEANING & MAINTENANCE

To assist gaining maximum life expectancy and performance, a regular cleaning & maintenance regime is recommended.

---

### CLEANING & MAINTENANCE PRECAUTIONS

- Keep both sides of ViewShade clean, using a soft-bristle brush or sponge with a mild soap solution diluted with water. After a thorough clean, remove any residue, hosing with clear, cold water.
- Alkaline or solvent based cleaners are not recommended and avoid harsh scrubbing or rubbing.
- Do not use a high-pressure hose to clean up.
- It is important to immediately remove any foreign substance contact; bird droppings, vegetable matter or BBQ emissions etc.
- Keep petrochemicals, solvents, and other such fluids away, along with fertilizers, insecticides and other garden sprays.
- Allow to completely open air dry before stowing your sun shading solution away.
- It is recommended to clean ViewShade every 6 months or when there is noticeable build-up of dust, dirt & grime

Spicers ViewShade is treated with anti-bacterial and anti-fungal treatments, providing protection so the fabric looks and performs better, longer. Spicers ViewShade does not support mould and mildew directly on its surface, rather, dust, dirt & grime that builds up on the surface can support it.

### PREVENTING SPREAD OF MOULD AND MILDEW AND TO REMOVE STUBBORN STAINS

- Combine a mix of 1-part chlorine bleach to 20-parts lukewarm water, creating a weak concentrate.
- Apply to affected areas with a soft-bristle brush, sponge or soft cloth. After cleaning and before the solution dries, thoroughly rinse all residue by hosing with clear, cold water.
- Allow to completely open air dry before stowing your sun shading solution away.
