SPECIAL INSTALLATION NOTES FOR CLUTCH SETS

88969, 88969HDX, 88969HDT, 96969, 98969T, 98969HD, 98969HDT, 88991HDX, 98991, 98991HD

These clutch sets include a diaphragm replacement pressure plate for Ford Long Style 11 inch. The image below shows the proper mounting bolt holes to be used to fit this pressure plate to your flywheel.

Three of the marked bolt holes are drilled 5/16", three are drilled 3/8". Most flywheels use a 5/16" bolt hole mounting pattern, for these flywheels use the standard 5/16-18 mounting bolts to attach the cover. The pressure plate will center properly on the 5/16" bolts even though the other 3 holes will be oversized.

If using an aftermarket flywheel with 3/8-16 mounting holes, you can drill out the 3 – 5/16" cover mounting holes to 3/8" to facilitate mounting.
