RE: SUNY Orange GHGE Analysis

Dear Kirsten,

Steven Winter Associates has reviewed the excel spreadsheet you provided entitled "SUNY Orange GHG Analysis_Final_USE-n-KEEP.xlsx". Our analysis was focused on the validation of the GHGE numbers contained in the spreadsheet document. We find that the calculations used in your Greenhouse Gas Emissions reporting are correct and appropriate and that the information used to support those calculations is both accurate and complete.

Sincerely,
Steven Winter Associates, Inc.
