Showing Rows: 1 - 4 Of 4

17 - Are there any other reasons that cause you to limit your use of water at home or in your dorm?

Are there any other reasons that cause you to limit your use of water at ho...

No

Water scarcity

No

Environmental issues

No

No

no

no

none

Poor tap water quality and expense of bottled water

I dont like to spend much water because for me it is very valuable

Mainly for conservation

No

nope

conservation of energy of energy and water due to the decrease in the availability of water as well as to lessen carbon and ecological footprint

I was always taught to not waste anything, including water

Water bill

Lower water bill

not really

Since its one of the essential needs i do care about it

for future generations

Its not a good habit to waste water . Its "Haraam" too.

I feel the scarcity of resources and aware that this is a real concern in our life!

Mum saying "dont waste water there are kids dying because they dont have access to water!"

price and energy used to generate the water/electricity

Less water pressure for the other users of the house

No

No

it is desalinated water

-

no

Water bill

I feel guilty if i waste water. Not everyone has access to clean water.

After taking the env class I started thinking about the usage of water

No

No

Just not to waste it for the sake of wasting it

Lack of time (shorter showers)

No

Because where I am from, especially in the rural areas, it can be difficult to acquire access to safe water so I was raised to not waste water because it was difficult for the more poorer members in my society to acquire it.

Personal awareness

no

Reduce excessive waste

no

to save university resources

It isn't right to waste something just because there 'seems' to be an abundant flow of it.

Wasteful

at home to reduce water bills

no

No

No

No

To lower the water bills

At home to reduce the water fee

No.

Time at home

No

No

Respect for other students who are also using the water.

No

The limited amount of water

Environmental and Economical

To reduce bill payment and to help the environment and not to wast

No

No

Care about see animals

No.

Sense of responsibility for all the resources I use daily

i feel bad

Financial condition

To avoid being wasteful.

no

My believe

I don't believe in waste.

n/a

No.

water heater too small so i try to limit my use to the existing hot water quantity

It's part of my lifestyle.

I believe that preserving and using water efficiently on a macro scale will bring some equality in global distribution of water.

No

Common sense and although we don't pay for water, someone is paying.

Bills

Conservation is a practice of Islam

To save what nature gave us

Religion

Religious conviction.

No

I try to use as less as possible because i think that awareness or general concern is low.

Principles

Told by family members to do so

The quality of the water

Not good to waste water some people do not have any

Spiritual Reason: From an Islamic point of view we are commanded to not waste water even if we are using water from a flowing river.

no

Concern about water supply in the UAE, and sustainability/cost of desalination.

It is not good to waste water.

Because it's the right thing to do..

the thought of waking up one day without water limits my usage everyday

no

No

nope

My morals. And the env course im registered for in uni.

yes

No

No

Nil

no

No

Nope.

Cost of water bills in Dubai

No

No

I feel bad

to not waste it!

to avoid water waste

No

Guilt

Water is life

Showing Records: 1 - 118 Of 118

18 - How often do you use the following methods to limit your use of water (at home or in your dorm)?

#	Field	Very often	Somewhat often	Not at all often	Never	Total
1	Take shorter showers	24.0%	48.3%	19.5%	8.2%	267
4	Water outdoors during early morning or evening	22.0%	24.9%	25.4%	27.7%	173
3	Reduced landscape area irrigated	17.0%	27.9%	26.5%	28.6%	147
5	Installed a water efficient irrigation system	11.3%	23.2%	25.8%	39.7%	151
2	Installed low-flow plumbing fixture(s)	9.2%	23.7%	25.4%	41.6%	173

Showing Rows: 1 - 5 Of 5

19 - Are there any other methods that you use to limit your use of water at home or in your dorm?

Are there any other methods that you use to limit your use of water at home...

No

No

no

stop running water when brushing my teeth

No

No

No

nope

The basics, close the tap while you're brushing your teeth

Closing tap while brushing teeth

Sometimes trying to reuse rainwater which could not reach my shaded plants etc.

just never keep the water on when not being used and shower for not too long

using vacuum pressure in toilet instead of water.

I always keep a low flowing water tap when I need to use it.

Use the minimum amount of what covers the need, advise my family member to do so.

turn the tap off while I brush my teeth

close the tap between my moves, to stop the water from flowing when I am not using it.

No

sweep instead of hose

no

make sure water is not running if it is not in use

No I don't

-

Yes, for instance, I inform my family about using the water less also

No

No

by for example using a specific stuff in the bathroom to reduce the water spending that i use, by closing the light and many other things.

No

Never leave the tap running (eg. while brushing teeth)

No

no

Not eating animal products....because those use way more water than taking short showers ever could

no

Don't keep the tap on while brushing, don't keep the tap on at full stream while doing the dishes

turning the tap when brushing my teeth

no

No

make sure that the water taps are well maintained and are not leaking

Using washing up water and old water from kids' water bottles to water the garden

I try to use less water

Recycle your sewage waste

No

No

Reapir leaky taps, reuse water.

Only wash full load of laundry, no running water when brushing teeth

N/A but I am going to!!!

No

No

Use shorter programs in my washing machine.

turn off water while brushing my teeth

no

no

fill buckets of extra water and use them

not really

No.

no

Try to use waste water in other purposes

I turn off the faucet when soaping my dishes.

When I shower, I try to limit my timing up to 7 mins at most. Also, when I wash my face/brush my teeth I try to keep the tap closed when I'm not currently using it, i.e. I don't like to keep the water running

Well I'm working on a research on how to convert water from air in moist environments as an alternative. If Successful, that will be my main method.

No

Close the water when I brush my teeth

Try to remind everyone in the house to conserve water

Following a vegan diet and opting for sustainable clothing brands

Water bottles

No

I can't think of now

Reduced the size of the Toilet Flush by inserting a filled water bottle

Reusable water bottle. Grouping laundry/dishes.

make the pressure low while using

not keep the tap open when brushing teeth

pour the water in a container for using it (i.e. not using water directly from the tap).

conserving water when washing dishes

my boys wash the car with waterguns, rather than go to the car wash.

Reuse some grey water to irrigate outside

no

Never leave any taps on when they don't need to be

No

Yes. Use water from bucket while showering

water savers

Close tap when brushing my teeth

Close the water when I'm brushing my teeth

Nil

no

No

Nope

No

no

close faucet while brushing teeth; don't throw away left over water in my cup - drink it later

Turn off water while washing dishes, turn on only when rinsing.

No

Saved left over water in glasses and water bottles and put it on plants

Showing Records: 1 - 92 Of 92

20 - How do you deal with running or leaky toilets and faucets? (Please select all that apply.)

#	Field	Percentage
1	Repair it myself immediately	13.8%
2	Call a plumber or maintenance immediately	65.8%
3	Try to remember to jiggle toilet handle	6.3%
4	Have the leak fixed within one week	23.0%
5	Have the leak fixed eventually (longer than one week)	4.5%
6	Close the door and turn up the TV	0.4%
7	Other (please specify):	1.9%

Other (please specify):

Sometimes Collect the water in a bucket until repaired

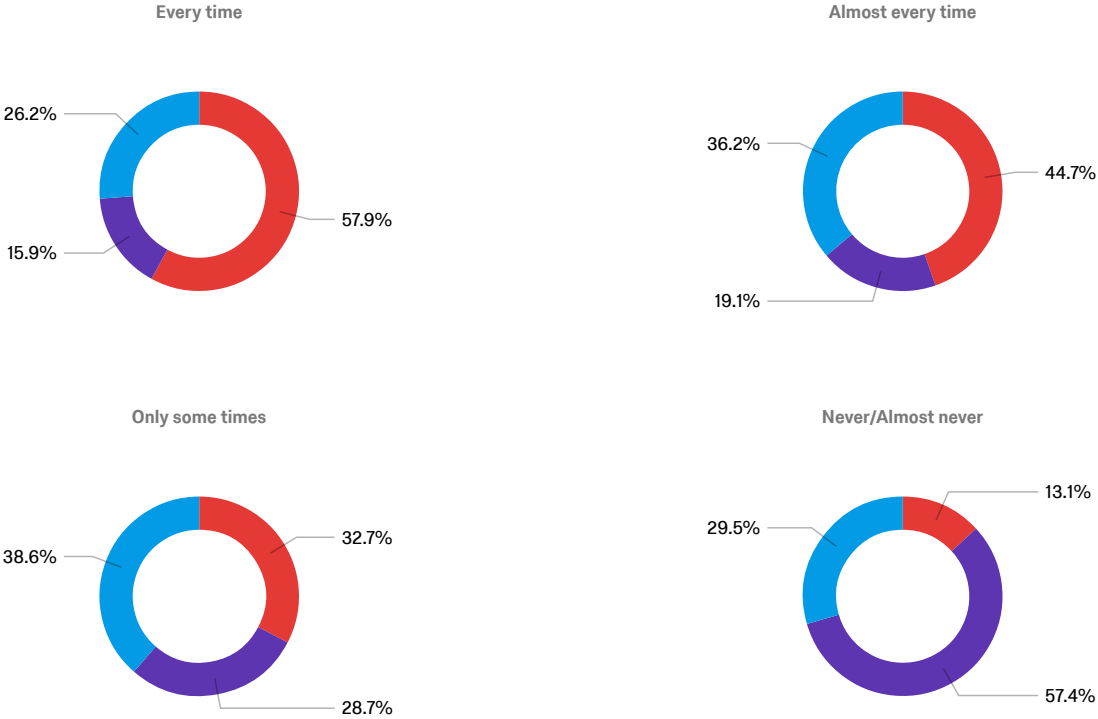

report the problem to my husband who can fix some things

close main inlet valve in case of major leak.

turn the main supply off and call plumber

Showing Records: 1 - 4 Of 4

21 - How often do you run water continuously for any of these reasons?

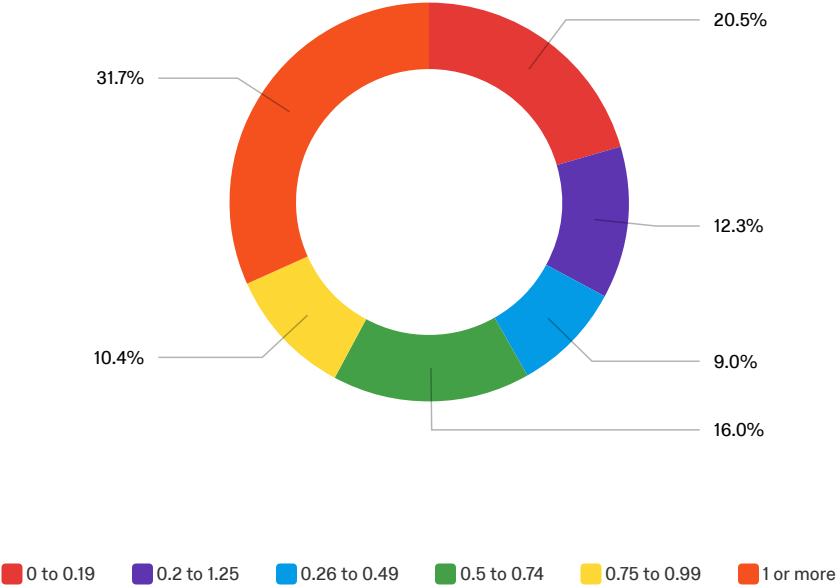

While I wait for the water to become hotter or cooler While brushing my teeth While hand-washing dishes/preparing dishes for the washer

22 - How often do you drink water directly from a tap (without boiling or filtering it)?

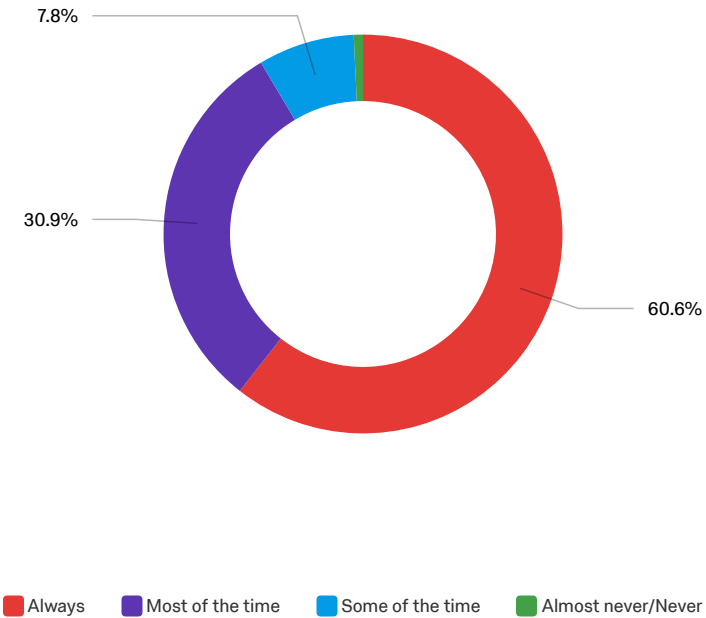

#	Field	Percentage
1	Never	87.7%
2	Occasionally	9.3%
3	Often (once per week or more often)	0.7%
4	Always	2.2%
		269

Showing Rows: 1 - 5 Of 5

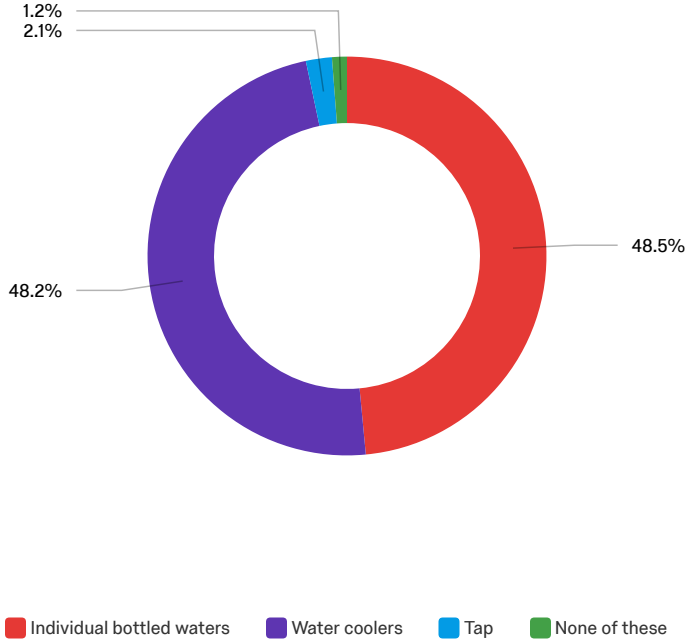

23 - How much total water from disposable water bottles do you drink per day (specify liters)?

24 - When you drink from disposable water bottles, how often do you finish all of the water in each bottle?

Q43 - What is your preferred source of drinking water? (Select all that apply)

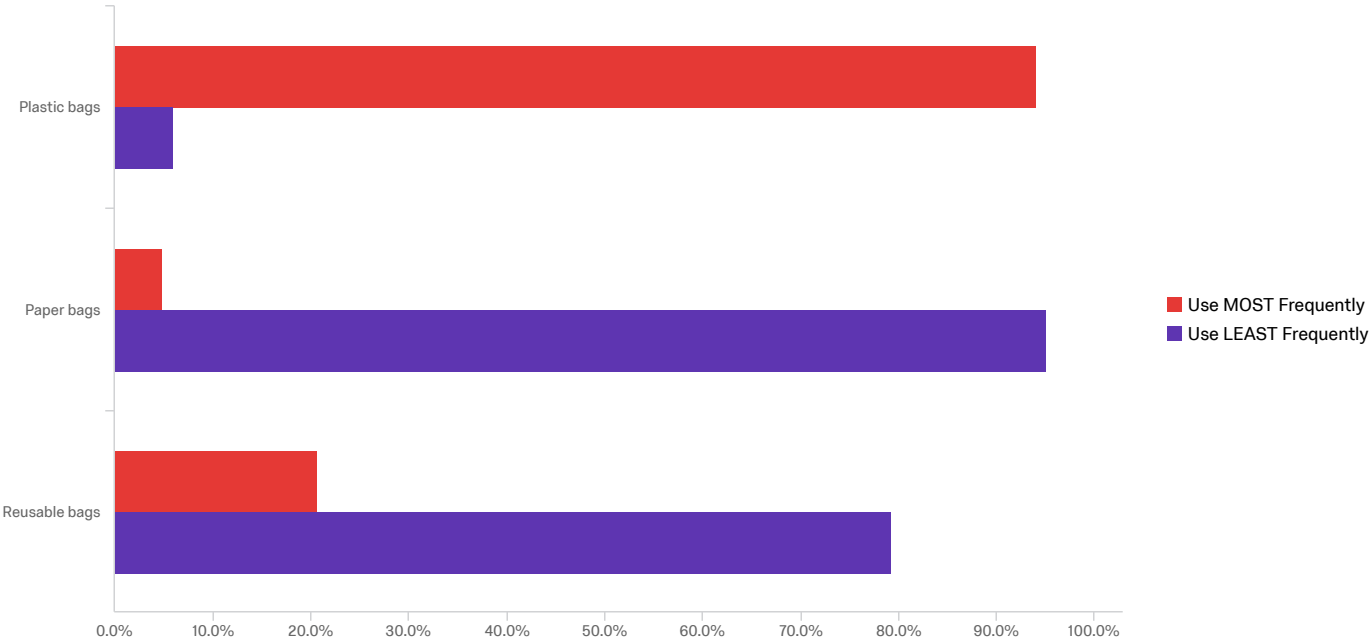

25 - When you drink from disposable water bottles, about how much of the drinking water goes to waste (liters) each day?

#	Field	Percentage
1	0 to 0.19	82.0%
2	0.2 to 1.25	7.5%
3	0.26 to 0.49	5.6%
4	0.5 to 0.74	2.6%
5	0.75 to 0.99	0.4%
6	1 or more	1.9%
		267

Showing Rows: 1 - 7 Of 7

26 - When grocery shopping, which do you use most frequently?

When grocery shopping, which do you use most frequently?

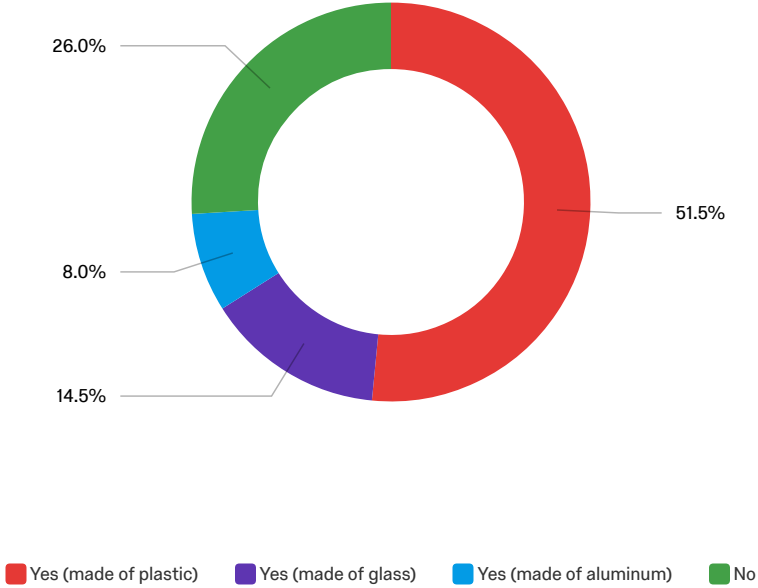

27 - About how many large bags of waste (e.g. 13 gallon) do you/your household throw out per week? Please include recycled waste in this estimate.

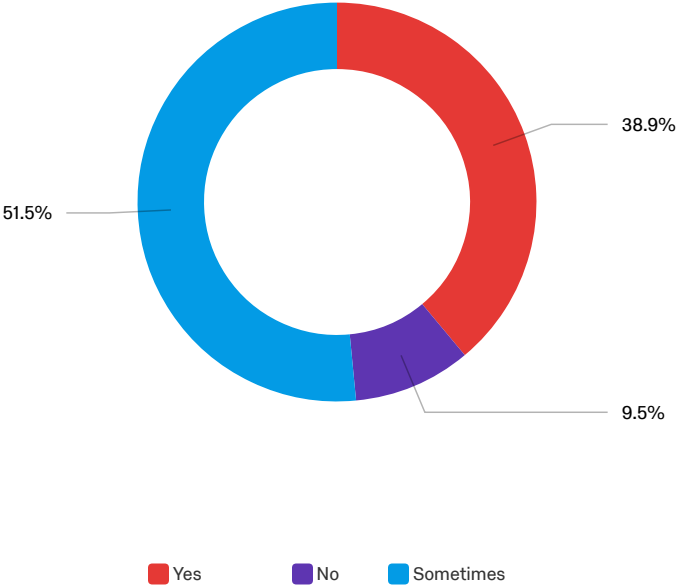

#	Field	Percentage
1	Less than 1	7.3%
2	1	14.9%
3	2	21.0%
4	3	13.0%
5	4	8.8%
6	5 or more	17.2%
7	No idea	17.9%
		262

Showing Rows: 1 - 8 Of 8

28 - Do you use a reusable drinking water-bottle?

29 - Do you make an effort to recycle?

30 - What materials do you recycle? (Select all that apply.)

#	Field	Percentage
		727
1	Paper (e.g. Book, Newspaper, Magazine, Greeting cards)	28.5%
4	Plastic (e.g. Carrier bag, Bottle, Yoghurt pot)	26.7%
5	Textiles (e.g. Clothes, shoes)	14.3%
2	Glass (e.g. Glass Bottle, Jar)	12.4%
3	Aluminum (e.g. Aerosol, Can, Foil)	9.8%
6	Electrical (e.g. Battery, Mobile phone, Computer)	5.6%
8	None of these	2.1%
7	Other items (please specify):	0.7%

Showing Rows: 1 - 9 Of 9

Other items (please specify):

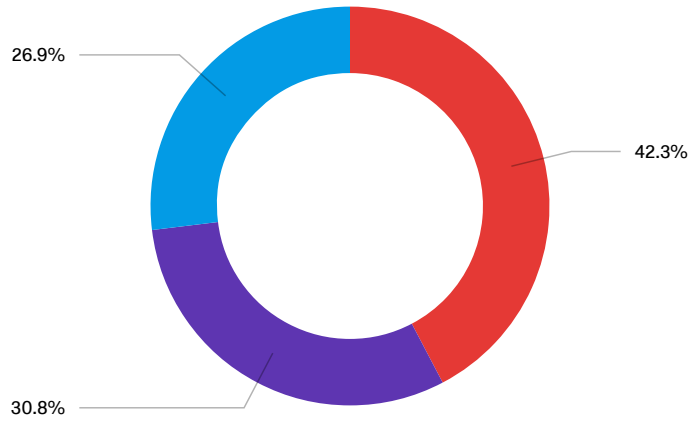

Other items (please specify):

Nespresso

I give back the ketchup and salt sachets to the restaurant instead of throwing them

Showing Records: 1 - 2 Of 2

31 - Why don't you recycle? (Select all that apply)

I don't get anything out of it directly I don't see the point/it doesn't make a difference Other reason (please specify):

Other reason (please specify):

Other reason (please specify):

There aren't any guidelines that help us recycle and how to differentiate between product types. Moreover, recycle bins aren't easy nor close to access.

I don't know how to.

Not enough time

it isn't very convenient in dorms

don't remember to do it

We have seen the garbage collectors go to the recycling bins and empty them directly into the garbage truck. I was so disappointed in learning this and I quit recycling, and it angered me.

Showing Records: 1 - 6 Of 6

32 - How often do you use the following recycling bins while on the AUS campus?

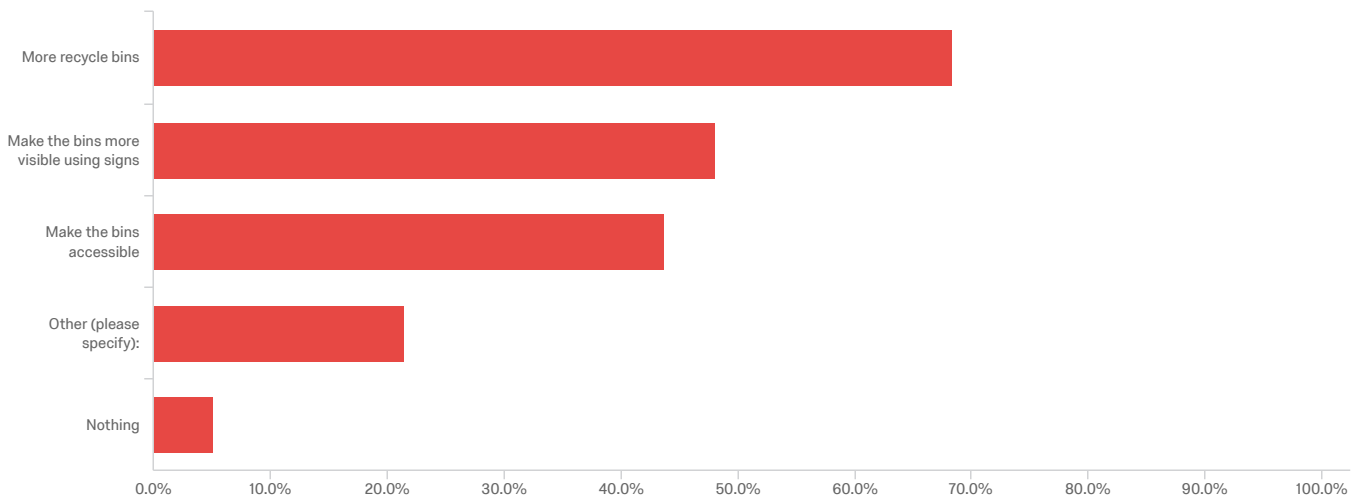

#	Field	Very often	Somewhat often	Not often at all	Never	Not applicable because I don't need to.	Total
1	Plastic bottle bin	38.1%	34.2%	11.2%	9.6%	6.9%	260
3	Paper bin	32.4%	36.3%	15.8%	9.3%	6.2%	259
2	Can bin	21.6%	27.4%	20.8%	13.1%	17.0%	259

Showing Rows: 1 - 3 Of 3

33 - On a scale of 1 to 10, with 10 being extremely happy and 1 being not at all happy, how happy are you with the recycling procedures that are in place at the University campus?

#	Field	Minimum	Maximum	Mean	Std Deviation	Variance	Count
1	10 is extremely happy, 1 is not at all happy:	1.0	10.0	5.5	2.3	5.1	257

34 - Is there anything that the University can do to make recycling easier?

#	Field	Percentage
1	More recycle bins	36.6%
2	Make the bins accessible	23.4%
3	Make the bins more visible using signs	25.7%
4	Other (please specify):	11.5%
5	Nothing	2.7%
		478

Showing Rows: 1 - 6 Of 6

Other (please specify):

Other (please specify):

Educate people about the importance of recycling.

make sure bins that are for recycling in the dorms are actually seperated and educate cleanco to understand what they are

awareness

promote more

Place them near the Academic Buildings ; On Campus ; not like the far place for example the ones on the side of the Sports Complex

Maybe an electronics recycling bin would be useful

include recycling bins for glass items

Just replace trash bins with recycle bins completely!

Change the slots for the bins; many times there would be a plastic that i need to recycle that is larger than the slot available, even for paper

Ensure effective collections. Recycle bins are not collected from dorms. Sust dep does not do its job properly

Put picture examples above bins for it to be more clear to everyone.

Do a lecture about recycling each semester to educate the student and to let us more learn where to put the stuff and what material can fit in the bins and what not because we do face hard time about that. plus there can be for example more machine to fill the bottles of water, and less machine for buying the plastic one so by that you are going to force the student to bring their own water and start using it. also you can make for example an aus brand for water bottles so student and everyone can support it by putting a small price for example with the logo of aus and a style where everyone will like and suggest

Make sure the recycling bags are properly separated and not all collect in the same place

Bigger recycling bins in homes

Place water coolers all over campus and discourage students from buying bottled water. Instead encourage students to get their reusable bottles and fill them on campus

Have more variety

Provide more bins because they easily get filled

Provide ways to make it easier for people to recycle. Trucks that pick up people's separated trash. If it is easier for people they will do it. No one wants to take out their different trash bags to the public bins. If it's easier more people are likely to do it

Stop others from throwing waste in them

Encourage people to pick up and deal with their own waste through awareness and activities. Enforce them if necessary.

Spread awareness

Bigger glass recycling bin. There is only 1 and it is so small and always full!

Raise more awareness to other colleges

make recycle bins opening bigger

posters around college

Rewards

Giving Incentives to students for recycling things that can be recycled

The opening for "plastic" and "paper" in the recycling bin are not big enough to fit bigger items like large paper cups

Carry out continuous awareness campaigns

Creating more awareness about recycling. And i suggest ENV 194 should be a compulsory course because the whole issue of sustainability is dependent on education. The more educated the population are the more sustainable we are.

Provide glass recycle bins

make it easy to recycle glass

Ensure that the bins are collected in the appropriate way ie. the recycling is often collected by the general waste truck from Sharjah. This is the case outside FBK even though this issue has been raised consistently it still persists

make more types of recyclable disposal e.g. electronic items

The blue dumpsters are ineffective. We need bins for specific types of recycling. Also, the bins can't look like garbage bins! Ignorant people don't get the current system.

Replace all bins with recycle bins and keep an option for general waste

have more variety for recycling

Glass bins in dorms and around campus

Education

open communication of what can be recycled and where recycling occurs

water coolers for students as well

make the bins bigger

We should have solar panels.

Actually recycle and not lie about it!

its not the university, its the mentality that recycling isnt useful. Hence, students tend to mix their trash between different recycling bins

Make bins more aesthetically pleasing, more attractive so people will spot them better than bins that arent used for recycling.

More awareness

Explain people what they are meant for as it doesn't seem like they know the difference between plastic, paper and can sometimes

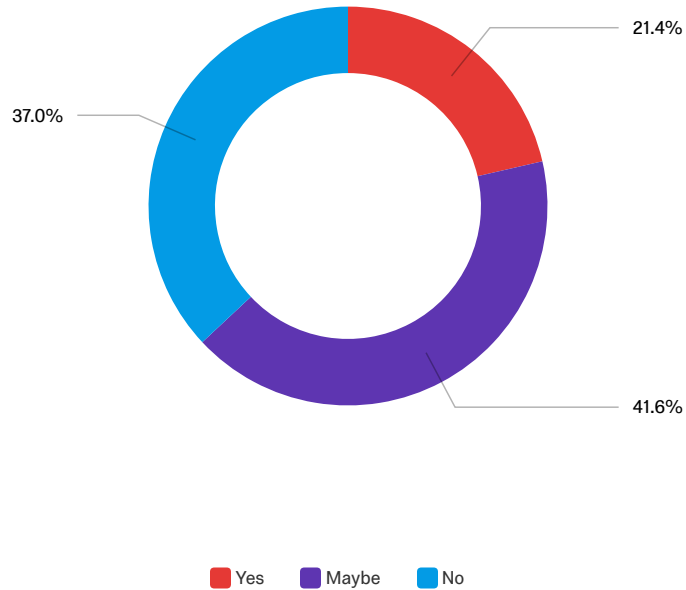

in housing

Reassure people that recycled materials are actually, truly recycled.

The problem is that other people throw trash in the recycling bins and vice versa, both in housing and offices. It makes me wonder if the materials are actually recycled.

The paper bins are designed to take paper sheets only. The opening cannot take .. say paper cups

35 - Are you interested in participating in a focus group within the next few weeks to gain more insight into your opinions of AUS sustainability practices?

#	Field	Percentage
1	Yes	21.4%
		257
3	No	37.0%
2	Maybe	41.6%
