

The Center focuses on the discovery and dissemination of practices and strategies that are ecologically friendly, economically sound, and socially responsible.

Our goal is to help Michiana become one of most vibrant and leading regions in the emerging green economy.

Sustainability is supported throughout Indiana University by a collaborative network with focused initiatives supporting the IU Bicentennial Strategic Plan Core Value: Sustainability, stewardship and accountability for the natural, human, and economic resources and relationships entrusted to IU. The notion of a safe, vibrant, and healthy community is paramount, and it is characterized by a culture of care that is embodied by our students, staff, and faculty.

CENTER FOR A SUSTAINABLE FUTURE
INDIANA UNIVERSITY SOUTH BEND

Sustainability is meeting the needs of the present without compromising the ability of future generations to meet their own needs.

INDIANA UNIVERSITY SOUTH BEND

CENTER FOR A SUSTAINABLE FUTURE

Growing a culture of sustainability at IU South Bend
and across Michiana since 2008.

WHAT WE DO

Student led projects address the most pressing issues on campus and community and foster the growth of a more sustainable future.

Communication across multiple platforms and with numerous community partners allows the Center to learn, share, and engage with communities across Michiana to grow a more sustainable future together.

Connecting our partners to one another and to our students, and empowering campus to work with community partners enables greater support and momentum towards a sustainable future.

WHO WE ARE

We focus on the discovery and dissemination of practices and strategies that are ecologically friendly, economically sound, and socially responsible. Our goal is to help Michiana become one of most vibrant and leading regions in the emerging green economy. As a part of CLAS, the Center works across disciplinary and programmatic boundaries to build collaborative efforts across its Centers and academic programs.

The Center promotes scholarship and a networking of skills and resources between academia and the community. By promoting opportunities for written and collaborative research, individuals interested in learning and sharing research in the emerging field of sustainability studies can both participate and publish.

Sustain IU

Sustainability is supported throughout Indiana University by:

Encouraging everyone to play a role in creating a living legacy, committed to a sustainable future for all.

Empowering staff, faculty and students to ensure a lasting positive impact.

Identifying and promoting sustainable solutions that reduce environmental impacts while supporting an equitable and prosperous IU, now and into the future.

We're proof that every Hoosier plays a role in creating a lasting legacy.
