

CENTER FOR A SUSTAINABLE FUTURE
INDIANA UNIVERSITY SOUTH BEND

December 16, 2020

STARS Review Team:

I am writing to affirm that the STARS submission for the Indiana University South Bend campus has been reviewed in full and that any identified inconsistencies have been addressed.

As described in section IN-18, numerous people contributed to this report and many reviewed it again to ensure that all data and comments accurately represent campus initiatives. I have personally been involved in detailed reviews of all sections of this report. After working with individuals on this campus, we turned to our colleagues on the main system campus, Indiana University Bloomington (IUB), to review it as well. Since IUB has completed reports in the past and turned their most recent one in earlier this year, they advised on system wide credits and how to respond to areas that were challenging to address as a regional campus within a larger system.

On our campus, the Dean of the College of Liberal Arts and Science, who works with the Sustainability Studies program, the Center for a Sustainable Future, and the largest cohort of programs on campus reviewed the report. At the administrative level, the Executive Vice Chancellor for Academic Affairs also reviewed this submission. These reviews were monitored by the Chancellor, who has officially shared their support for this report.

Please be in touch if you have questions or concerns about this process, or require any further clarification.

Sincerely

A handwritten signature in black ink that reads "Krista Bailey".

Krista Bailey
