

Seneca's Office of Sustainability

The Office of Sustainability (SoS) was created on 2021 as part of one of the key actions of Seneca's [Sustainability Plan – “Our Path Forward”](#). The main objective of the office is to connect students, faculty and staff from across the institution with information, tools and inspiration for the challenge at hand, making Seneca sustainable for the long term.

Continuing to build on a strong foundation, the SoS acts as a central coordinating, supporting and communicating body that unites sustainability aspirations and actions.

Students can reach out to SoS if they wish to learn about the current sustainability initiatives on campus, how they can relate them to their programs and how they can get involved.

If you need support or have any ideas to make Seneca more sustainable, please reach out at sustainability@senecacollege.ca
