## BARNARD SUSTAINABILITY FIRST YEAR GUIDE 202

CLIMATE CHANGE IS ONE OF  
THE MOST IMPORTANT AND  
PRESSING CHALLENGES  
OF OUR TIME

The urgency of this climate crisis demands action that redefines leadership, crosses disciplinary and intellectual boundaries, and addresses the structural inequalities that contribute to our current global predicament.

Barnard's climate action vision, the result of campus-wide collaborative effort, outlines our 360-degree approach that prioritizes the role of women, people of color, and low-income communities in defining new paradigms for climate leadership.

## ENVIRONMENTAL JUSTICE

The consequences of climate change have a disproportionate impact on women, people of color, and those who are most economically disadvantaged in the U.S. and across the world. It is vital that the search for climate solutions include diverse viewpoints and prioritize those who have been and will be most affected. We must embrace an intersectional climate justice movement when discussing our current climate issues. Check out our website for action items, resources, and courses you can take.
