Re: Sustainability performance report

Dear
STARS Steering Committee,

The Instituto Tecnológico Metropolitano (ITM) is a public university institution in Medellín, Colombia. Our institutional policy, **Transformative Innovation for Sustainability** (*Innovación Transformativa para la sostenibilidad*), seeks to articulate science, technology, innovation, and art production to consolidate a sustainable development model for humanity. Therefore, our actions are in line with the 2030 Agenda for Sustainable Development.

In accordance with our institutional policy and plans, we have decided to measure the sustainability performance of our institution using The Sustainability Tracking, Assessment & Rating System (STARS). Our objective is to establish our contribution to sustainability and thus identify improvement actions that result in a more sustainable and socially responsible type of management.

Attached we are sharing our sustainability report with you. We have completed the following credits: institutional characteristics, academics, engagement, operations, planning, and administration. We are very happy to be part of this initiative and will be ready to answer any question you may have.

Sincerely,

Erica Naslin García Flórez
Director of Planning
Instituto Tecnológico Metropolitano
Medellín, Colombia
